Package components:	All available Single Stock Futures on components of the indices mentioned in section 1				
Package review:	If due to a corporate action in one of the underlying instruments a successor product is admitted to trading with a standard contract size, the successor product will become part of the package with effect from the first trading day of the next calendar month following the admittance to trading of the successor product. The Building Block requirements remain the same for the successor product. The preceding contract will be part of the group "others" after the end of the month where the successor product is admitted to trading. The quotation requirements for the group "others" apply to the preceding contract accordingly. If one of the underlying instruments leaves any of the indices covered by the packages the respective single stock future will be replaced by the single stock future on the underlying entering the respective index with effect from the first trading day of the next calendar month following the entering of the respective single stock future. The spread class of the entering product will be FSTK 2 and the basis minimum quote size will be 10 if not specified otherwise. The single stock future on the underlying leaving the index has to be quoted until the end of the month where the respective single stock future entered in the composition of the index. Changes to the packages for the above mentioned reasons will be reflected in the quotation parameters table (cp. Sec. 4.2) as of the first trading day of the month.
