Summary:

On Friday, **March 26, 2010**, after close of trading, Eurex will distribute update kit 2 for Eurex 12.0 Production, update kit 3 for Eurex 12.0 Simulation and the update kit 1 for Eurex 12.0 Advanced Simulation.

The installation of the Eurex 12.0 update kits in the corresponding environments on all MISSes and workstations is optional, but strongly recommended for all Trading Members using the Eurex Trading GUI. Nevertheless, Eurex requests all Members to install the update kit 2 on all MISSes and Workstations in the production environment at the earliest possible opportunity. Support can only be provided on the basis of the most recent software versions.

The Eurex 12.0 update kits contain the following important software fixes:

1. Solution of a Eurex Trading GUI issue
2. Solution of European Energy Exchange (EEX) specific issues.

Eurex Release 12.0: Distribution of Production Update Kit 2, Simulation Update Kit 3 and Advanced Simulation Update Kit 1

After close of trading on Friday, March 26, 2010, Eurex will distribute update kit 2 for Eurex 12.0 production, update kit 3 for Eurex 12.0 simulation and the update kit 1 for Eurex 12.0 Advanced Simulation.

Please note: Although the installation of the update kits is not mandatory, Eurex requires all Members to install update kit 2 on all MISSes and Workstations in the production environments at the earliest possible opportunity. Support can only be provided on the basis of the most recent software versions.

The Eurex 12.0 update kits contain the following important modifications:

Solving of a Eurex Trading GUI Issue

With the new Eurex Trading GUI (EurexGUI.jar) contained in these update kits, the issue "*potentially incorrect display of the remaining volumes of persistent orders in the Own Order Overview window of the Eurex @X-ceed Trading GUI in case such orders have experienced several partial executions*" has again been addressed.

Although the above issue was generally solved with the initial software fix published on February 5, 2010 (eurexr120_upd1_hf20100203), it has come to Eurex's attention that there are some very rare configurations in which it may still occur. This has now been fixed with the new version of the Eurex Trading GUI.

Solving of European Energy Exchange (EEX) specific issues

The issues with the buttons "Login" and "Logout" in the EEX Login/Logout window and with the EEX trader profiles which did not work as expected have been solved.

Distribution of Update Kit 2 for Production, Update Kit 3 for Simulation and Update Kit 1 for Advanced Simulation

Eurex 12.0 Production, Simulation and Advanced Simulation update kits will be transmitted to the Eurex Members via File Transfer Protocol (ftp) on Friday, March 26, 2010, after 23:00 CET.

The software will only be sent to the following paths on the registered report nodes:

Production:

- SUN Solaris (MISS): /opt/gate/transferdir/release00
- Windows (MISS): <ftp-root directory>\release00

Simulation:

- SUN Solaris (MISS): /opt/gate/transferdir/release01
- Windows (MISS): <ftp-root directory>\release01

Advanced Simulation:

- SUN Solaris (MISS): /opt/gate/transferdir/release03
- Windows (MISS): <ftp-root directory>\release03

Please ensure that the Eurex 12.0 Production, Simulation and Advanced Simulation environments are connected to the Eurex network on Friday, March 26, 2010 from 23:00 CET onwards.

For data transmission, the above mentioned target directories should have a total free disk space per environment of approximately 60 MB for Production, 150 MB for Simulation and 50 MB for Advanced Simulation.

In parallel, the kits will be made available for download from the Eurex website www.eurexchange.com under the following paths:

Member Section > Releases > Software Kits > Eurex 12.0 Production

Member Section > Releases > Software Kits > Eurex 12.0 Simulation

Member Section > Releases > Software Kits > Eurex 12.0 Advanced Simulation

Please note that the Eurex Release 12.0 Production update kit 2, Simulation update kit 3 and Advanced Simulation update kit 1 for SUN Solaris on the x86-platform will only be published on the Eurex website under the above mentioned paths.

The update kits should be installed according to the instructions contained in the “read-me” file, which will be sent together with the kits to the respective target transfer directories.

If you have not received the Eurex 12.0 Production update kit 2, the Simulation update kit 3 and the Advanced Simulation update kit 1 by Tuesday, March 30, 2010, please contact your Technical Account Manager via VIP number or Eurex Customer Technical Support on tel. +49-69-211-1 12 00, or send an e-mail to eurex-help@deutsche-boerse.com.

Should you experience difficulties logging in to the Eurex Member Section, please contact the Service Point hotline on tel. +49-69-211-1 78 88.
