1. Designated Market-Making Fees:

Upon fulfilment of quotation requirements pursuant to Number 2 on a monthly basis, Eurex Clearing AG will reimburse fifty (50) percent of the transaction fees for electronic order book and off-book transactions for all trades in SSDFs in the respective package concluded by Designated Market Makers (DMMs) on the M-account.

For the avoidance of doubt:

Where the first expiry in the contract series is December 2016 and the permissible percentage spread is noted as 20 percent for that expiry - then to fulfil the obligations the offer price must be no greater than the bid price plus 20 percent of that bid price.

For example: If the quoted bid is 3.50 and the permissible percentage spread is 20 percent then the offer price must be no greater than 4.20.

If due to a corporate action a successor product in one of the underlying instruments is admitted for trading with a standard contract size, the successor product will become part of the quotation requirements with effect from the first trading day of the next calendar month. This shall also apply if any index component is changed.
