Content may be most important for:	**Attachments:**
➲ All departments	none

Corporate actions in Single Stock Futures (SSFs) lead to adjustments of the contract size and settlement prices if there is open interest in the relevant product on the last cum trading date. To make trading more transparent, a standard SSF contract on the same underlying with a new Product ID and Product ISIN will be listed as soon as possible after the relevant corporate action. The last letter of the Product ID of the new contract is an ascending one.

As of **July 14, 2009** you find an overview of the adjusted contracts and the new standard contracts with the most important product parameters under the following path:

www.eurexchange.com > Trading > Products > Equity Derivatives > Single Stock Futures > Adjustments due to Corporate Actions

Only products with the status “TRAD” are included in the list. SSFs with the status “HALT” are not considered.
