Adjustment of ISIN:

The ISIN of the KONE Corporation share (FI0009013403) will remain unchanged.

Procedure:

Determination of Adjustment Factor (R-Factor)

The closing auction price of the KONE Corporation share at the NASDAQ OMX Helsinki on the last cum trading day, March 1, 2010 will be the basis for determination of the R-factor. The price will be reduced by the regular dividend. The price resulting from this will serve for determination of the R-factor.

S1	Closing auction price of the KONE Corporation share
S2	S1 minus regular dividend
S3	S2 minus extraordinary dividend
R-factor	S3/S2

1. Adjustment of Contract Size and Variation Margin

To adjust the calculation of the Variation Margin of the following exchange trading day, settlement prices of the last cum trading day will be multiplied by the R-factor.

The new contract size will be calculated as follows:

Contract size new = contract size old / R-factor

All outstanding orders and quotes will be deleted after close of trading on the last cum trading day.

The adjustment also refers to existing positions in OTC Flexible Futures.

2. Introduction of a new Contract

A new contract on KONE Corporation shares will be introduced with standard contract size 100 and new product code KC4H.

The exact date of introduction will be published via the **Market Supervision Messages** window.

As soon as the new contract is available for trading and there are no more series with open interest in the original contract on KONE Corporation shares (KC4G), trading in this contract will be put on “HALT” and finally discontinued.
