As announced in Eurex circular 233/09, Eurex launched thirty equity options on British stocks on January 18, 2010.

To enable the dissemination of market data for these products, Eurex initially selected an existing Enhanced Broadcast Solution product group. In order to provide members with the best possible flexibility when subscribing to market data, Eurex will define an addition product group (OSTK_UK) for the production environment of the Enhanced Broadcast Solution and transfer the appropriate products to this new group accordingly.

To ensure that market data distributed for the products in this group can still be received, members are requested to verify router/firewall configurations and make sure that data disseminated via the multicast address ranges **224.0.29.176 - 224.0.29.179** and **224.0.30.176 - 224.0.30.179** will be accepted. The existing port numbers (50000 to 50099) will remain unchanged.

The configuration changes will become effective on **March 1, 2010**.
