Summary:

On September 12, 2010, Deutsche Bank AG announced by means of an ad hoc message a capital increase with subscription rights for the shareholders of Deutsche Bank AG at a subscription ratio of 2:1. According to the message, the subscription price of the new shares will be determined and published on September 20, 2010. Subscription period will presumably start on September 22, 2010.

As a consequence of the capital increase, an adjustment to the Eurex options on shares of Deutsche Bank AG (DBK), the Eurex stock futures contract on Deutsche Bank AG (DBKF) and the dividend futures contract on shares of Deutsche Bank AG (D1BK) will become necessary.

Ex date is expected to be **September 22, 2010.**

This circular contains a description of the adjustment procedure.

Deutsche Bank AG: Capital Increase

Measure:
Capital increase with subscription rights for shareholders of Deutsche Bank AG

Subscription Ratio: 2:1
i.e. two old shares of Deutsche Bank AG entitle to subscribe to one new share of Deutsche Bank AG

Subscription Price:
Is planned to be fixed on September 20, 2010

Last cum trading day:
Presumably September 21, 2010

Ex date:
Presumably September 22, 2010

Start of Subscription Period:
Presumably September 22, 2010

Affected Products:
DBK, DBKF, D1BK

Reference to underlying Rules & Regulations:
Contract Specifications for Futures Contracts and Options Contracts at Eurex Deutschland and Eurex Zürich, Sections 1.6.7 (3), 1.15.8 (3) and 2.6.10.1 (3)

ISIN:
The ISIN of the Deutsche Bank AG share (DE0005140008) will remain unchanged.

Procedure

Determination of Adjustment Factor (R-Factor)

The official closing auction price of the Deutsche Bank AG share on Xetra® on the last cum trading day will be the basis for determination of the R-factor.

The R-factor will be determined with eight decimal places. It is calculated in the following way:

R = ((number of existing shares / number of new shares) * (1 - (issue price of new shares / closing auction price))) + (issue price of new shares / closing auction price)

Options

1. Adjustment of Strike Prices and Contract Sizes

All existing strike prices will be multiplied by the R-factor.

The contract size will be divided by the R-factor.

The version number of the existing series will be increased by 1.

The adjusted strike prices and contract sizes will be published via the **Market Supervision Messages** window immediately after close of trading on the last cum trading day.

New series with standard contract size 100 and version number 0 will be introduced effective the ex date.

All existing orders and quotes will be deleted after close of trading on the last cum trading day.

2. Exercises

Upon exercise of an adjusted series cash settlement will be made for the fractional part of the new contract size.

Futures

1. Adjustment of Contract Size and Variation Margin

The adjustment will be made with the same R-factor as for the options.

To adjust the calculation of the variation margin of the following exchange trading day, settlement prices of the last cum trading day will be multiplied by the R-factor.

The new contract size will be calculated as follows:

Contract size new = contract size old / R-factor

All outstanding orders and quotes will be deleted after close of trading on the last cum trading day.

2. Introduction of a new Contract

A new contract on Deutsche Bank AG shares will be introduced with standard contract size 100 and new product code DBKG.

The exact date of introduction will be published via the **Market Supervision Messages** window.

As soon as the new contract is available for trading and there are no more series with open interest in the original contract on Deutsche Bank AG (DBKF), trading in this contract will be set on “HALT” and discontinued.

Furthermore, as of September 22, 2010, no more new series will be introduced in the original contract (DBKF). Existing expiration months without open interest will be suspended from trading.

The adjustment also refers to existing positions in OTC Flexible Options and Futures contracts.
