none

In order to support Clearing Members by providing additional automation facilities, Eurex Clearing will introduce two new requests to the Eurex Clearing classic system FIXML interface:

- Position Close-out Request
- Position Exercise/Un-exercise Request

These requests have exactly the same structure as the respective requests of the C7 Eurex Clearing FIXML interface that was recently launched.

The additions will be made available in simulation as of start of business on **18 July 2014** and in production as of start of business on **28 July 2014**.

Volumes 4 and 6 of the Eurex Clearing classic system FIXML documentation and the respective schema files have been updated accordingly and can be found on the Eurex Clearing website www.eurexclearing.com under the following link:

Technology > Eurex Clearing classic system > System documentation > Eurex Clearing Interfaces
