➲ All departments	Only on the Eurex website

As announced in Eurex circular 300/11 a number of message layouts in the Enhanced Risk Solution will be modified in order to align this optional interface with the FIXML industry standard used in the new Eurex Clearing FIXML Interface. Therefore an updated version of the document “Enhanced Risk Solution Interface Specification - May 2012” has been created.

The new version of the Enhanced Risk Solution will be activated in the Eurex production environment on **May 7, 2012**. It will already be available for testing in the Eurex simulation environment starting on **March 5, 2012** in order to provide participants with sufficient time to adapt their applications according to the modifications.

As of January 13, 2012, the document will be available in the Member Section on the Eurex website under the following path:

www.eurexchange.com > Member Section > Releases > Eurex 14.0 > Interfaces > Enhanced Risk Solution

The direct link to the website is:
