As of **9 January 2017**, Eurex Participants and investors domiciled in the U.S. will have the following additional product available for trading:

- EURO STOXX 50® Index Dividend Futures (FEXD)

Eurex Deutschland submitted a written request to the Division of Market Oversight of the Commodity Futures Trading Commission (CFTC) to offer EURO STOXX 50® Index Dividend Futures in the U.S., and the contract has successfully passed through the CFTC notification period.

Pursuant to Eurex Deutschland's registration with the CFTC as a foreign board of trade, the EURO STOXX 50® Index Dividend Futures can be offered to U.S. persons via Eurex terminals with direct access in the U.S. or sold to these persons.

The respective new Product Assignment Group is XACFQE (before: XNCFQE).

For traders currently authorized to trade the product FEXD, the new Product Assignment Group must be assigned. This is the case for all Trading Authorizations and Transaction Size Limits.

Please note that despite the assignment of the product FEXD to the new Product Assignment Group, the Multicast addresses for data distribution will remain unchanged. Port numbers, however, will change as follows:

- Snapshot messages: Change from 59032 to 59000
- Incremental messages: Change from 59033 to 59001
