Roadmap for collateral: Collateral fee adaptations and incentives to strengthen CCP risk management

In response to changed market conditions, client requests and to further support the regulatory agenda, Eurex Clearing will introduce multiple measures in the course of 2018 concerning collateral fees and the default fund contribution.

Focus items within this roadmap are:

- Increase transparency with regard to returns on cash collateral
- Provide incentives for a balanced mix of cash and securities collateral
- Provide incentives for the migration from net to gross segregation and direct clearing models to improve portability and strengthen the CCP robustness in time of stress

The segregation incentive scheme is planned to be complemented later in 2018 by an adjustment of the default fund contributions taking the level of client segregation into account.

1. Introduction of a benchmark reference rate for the calculation of interest rates on customer cash collateral

In general, Eurex Clearing places cash on a secured basis, collateralized with high quality collateral. Currently, interests earned from such cash investments are passed on to Clearing Members on a voluntary basis, reduced by a cash handling fee per currency (Customer Interest Rates). To increase transparency, the calculation of Customer Interest Rates per currency will in future be based on publicly available benchmark reference rates.

The pre-defined benchmark reference rate per currency is shown in the table below:

<table>
<thead>
<tr>
<th>Currency</th>
<th>Benchmark per currency</th>
</tr>
</thead>
<tbody>
<tr>
<td>EUR</td>
<td>STOXX GC Pooling Overnight</td>
</tr>
<tr>
<td>CHF</td>
<td>SARON</td>
</tr>
<tr>
<td>GBP</td>
<td>RONIA</td>
</tr>
<tr>
<td>USD</td>
<td>Effective Fed Funds Rate</td>
</tr>
</tbody>
</table>

In a negative interest rate environment, Eurex Clearing only applies the above-mentioned benchmarks reference rates if the Customer Interest Rates calculated on the basis of such benchmarks are more beneficial for the customer than those calculated on the basis of actually realized expenses. In exceptional cases such as, but not limited to, extraordinary market conditions or disruptions, Eurex Clearing reserves the right to apply interest rates actually received through the placement of funds instead of applying predefined benchmark rates.

To implement the changes, the following provisions of the Clearing Conditions of Eurex Clearing AG (Clearing Conditions) will be amended as outlined in Attachment 1:

- Chapter I Part 1 Number 3.4.4
2. Changes to cash handling and the securities collateral fees

a. Changes to the cash handling fee

In May 2015, Eurex Clearing introduced a temporary reduction of 50 percent on the cash handling fee on margin collateral and default fund contributions for the currencies euro (EUR), Swiss franc (CHF) and US dollar (USD) in a negative interest rate environment. Following changes in the market environment and in line with market practice, this reduction will be abolished with effect from 3 April 2018.

b. Concentration add-on for the security collateral fee

For the calculation of the security collateral fee on margin collateral and default fund contributions, a sliding scale logic already applies depending on the cash proportion delivered. In line with the clearinghouse regulatory requirement for CCP liquidity resources, the lowest band of the sliding scale will be increased from 15 percent to 20 percent cash component.

In line with this, a Clearing Member with a cash collateral proportion of lower than 20 percent of the total margin and default fund requirement will be charged an additional 10 basis points as concentration add-on on security collateral. In order for Clearing Members to be able to adjust their collateral mix accordingly, this concentration add-on is waived until 1 January 2019. Members will be informed in a separate Eurex Clearing circular on the introduction date.

The following table provides an overview of the collateral fee charged for cash and securities valid as of 3 April 2018:

- Numbers 9.1, 9.2, 9.4, 9.5 of the Price List (Attachment 3)
3. Introduction of an incentive scheme for gross segregation and direct membership

a. Collateral fee incentive scheme for ISA Direct Clients (Basic Clearing Members), Registered Customers and Specified Clients in gross omnibus and individual segregated account models

To strengthen the robustness of the CCP risk management framework and client asset protection, Eurex Clearing provides an incentive scheme to support clients in gross omnibus (GOSA) and individual segregation (ISA). The following measures will apply to collateral provided to cover margin requirements and will become effective as of 3 April 2018:

- Registered Customers (RCs) and Specified Clients (SCs) clearing only Eurex Exchange Traded Derivatives Transactions (Eurex ETD) or Eurex ETD and OTC Interest Rate Swap (IRS) Derivatives Transactions (same Member ID/same account) will be charged half of both, the regular cash handling fee and the regular security collateral fee;
- RCs clearing only OTC IRS Derivatives Transactions benefit from a security collateral fee waiver already today. This waiver will be extended to SCs;
- ISA Direct Clients (BCMs) will be charged half of the security collateral fee. However, until further notice Eurex Clearing will waive the security collateral fee for BCMs.

The following table provides an overview of the collateral fee charges for clients qualifying for the incentive scheme as of 3 April 2018:

In order to benefit from the segregation incentives, the following requirements must be fulfilled:

- Clearing Members must set up a separate collateral pool ("ETD Incentive Pool") for RCs and SCs clearing Eurex ETD only or both, Eurex ETD and OTC IRS Derivatives Transactions (same Member ID/same account) under the gross omnibus segregation model;
- Clearing Members must set up a separate collateral pool ("OTC Incentive Pool") for SCs clearing only OTC IRS Derivatives Transactions under the gross omnibus segregation model.

RCs, SCs and their clients with the same right of incentive can share a common incentive pool.

For the setup of the separate collateral incentive pool it is required to submit a special form. Please contact your Group Client Key Account Manager Clearing.

To implement the changes, the following provisions of the Clearing Conditions and the Price List will be amended as outlined in Attachments 2 and 3:

- Chapter I Part 2 Number 4.2 (iii) of the Clearing Conditions (Attachment 2)
- Numbers 9.1, 9.2, 9.4, 9.5 of the Price List (Attachment 3)

b. Intended adjustment of the Default Fund contributions

To further support higher levels of segregation, Eurex Clearing intends to change the calculation of default fund contributions to take into account the type of segregation resp. the membership type. The change relates only to allocation of default fund contributions across Clearing Members, whereas other related elements of the framework, such as sizing of the Default Fund based on stress scenarios and “cover-2” calculations and also minimum absolute contribution amounts, remain unchanged.

Eurex Clearing will consult with market participants and the Risk Committee on an appropriate calibration.
