Eurex Clearing Circular 004/18

Common Report Engine (CRE) infrastructure upgrade

Summary

To provide additional storage capacity for future usage and for the implementation of additional security measures, Deutsche Börse is upgrading the Common Report Engine (CRE) infrastructure.

The new CRE infrastructure is available with immediate effect and can be used in parallel to the existing CRE infrastructure for a transitional period of three months. Following this transition period, the existing CRE infrastructure will no longer be accessible.

No changes are required for the CRE Regulatory Hub access, as the necessary changes have already been implemented.

In order to use the new CRE infrastructure, all Members who are using a client must accept the new server host key. If a script is being used for the retrieval of files and reports, the new server host key has to be included. All existing users and Secure Shell (SSH) key pairs remain unchanged and can also be used in the new CRE infrastructure.

A comprehensive description for accessing the CRE and the new server host key can be found in the CRE User Guide on the Eurex Clearing website www.eurexclearing.com under:

Technology > Eurex Clearing's C7 > System documentation > Release 4.0 > Eurex Reports

The new IP addresses to access the CRE are as follows:

Legacy CRE infrastructure			New CRE infrastructure			Port	
First	Second	Internet	First	Second	Internet	Public	Private
193.29.90.65	193.29.90.97	193.29.90.129	193.29.90.67	193.29.90.99	193.29.90.132	2221	2222

Please note: The legacy CRE infrastructure will be discontinued from **14 April 2018** onwards and therefore all Members must have completed the migration to the new CRE infrastructure before this date.

Date: 16 January 2018
