Eurex Clearing will enhance its in-house infrastructure for the Eurex Clearing FIXML Interface in order to achieve a higher availability as well as a better flexibility for further infrastructure upgrades without any additional member impact. For technical reasons, the IP addresses for the AMQP brokers of the Eurex Clearing FIXML Clearing Interface will change.

Eurex Clearing will use server certificates with a four year validity in order to reduce the need to frequently update Eurex Clearing's public keys. For technical reasons, the public keys and the names of the certificates will also change. The new public keys can be downloaded in the Member Section of the Eurex website via the following link:

Member Section > Current Eurex Releases > Eurex 14.0 > Interfaces > Eurex Clearing FIXML Interface.

The certificates of the root CA can be downloaded at https://www.verisign.com/support/verisign-intermediate-ca/secure-site-intermediate/index.html.

The change of the IP addresses and the usage of the new certificates will become effective as of start of business on **May 21, 2012** for **production.** The change in **simulation** will become effective after the simulation batch on **May 22, 2012**.

Details for both changes can be found in the following table:

Environment	IP Address	Port	Certificate	Effective
Production	90.155.253.100	10070	ecag-fixml-prod1.deutsche-boerse.com	May 21, 2012
	90.154.253.100		ecag-fixml-prod2.deutsche-boerse.com	(start of business)
Simulation	90.155.253.101	10170	ecag-fixml-simu1.deutsche-boerse.com	May 22, 2012
	90.154.253.101		ecag-fixml-simu2.deutsche-boerse.com	(post batch)
