Common Report Engine (CRE): Important technical changes and functional enhancements

Contact: Technical Account Manager via VIP number or
Eurex Customer Technical Support at cts@eurexchange.com

Content may be most important for:	**Attachments:**
➲ All departments	None

Important technical changes and functional enhancements will be made to the Common Report Engine (CRE) to coincide with the introduction of Eurex Exchange's new trading architecture, Release 1.1.

To improve both the internal delivery time to the CRE and the download time for participants, all reports for the Eurex new trading architecture which are delivered to the participant area within the CRE will only be available in a compressed format similar to the public area.

From **28 May 2013** onwards, all member-specific reports for environment 95 (Eurex new trading architecture simulation environment) and from **9 July 2013** onwards, all member-specific reports for environment 90 (Eurex new trading architecture production environment) will be compressed.

Currently, Report TA111 is still provided to both the participant area and the public area of the CRE. Starting from **28 May 2013**, the extended transition period will end and TA111 will only be available in the public area.

Starting **28 May 2013**, Reports TA110 and TD930 will also be made available in the public area. Both reports will still be delivered to the participant area for a transition period until **8 July 2013**.

A new RESTORE directory can be created on the business day directory level of the participant area. This directory is only created and populated if participants manually order retransmission of historical files and reports that are no longer available on the CRE.

If you have any questions or require further information, please contact your Technical Key Account Manager using your VIP number or via e-mail to: cts@eurexchange.com.
