Due to security reasons, Eurex Members using standard passwords in order to log in to the Eurex® system are no longer supported with the introduction of Eurex Release 10.0 on November 26, 2007.

With the introduction of the new release, Members have therefore been requested to change the standard password to a personal password during their first login to the Eurex® system.

In order to guarantee highest possible security, all Member IDs which are still stored in the Eurex® system with the standard password will be deleted as of **August 29, 2008**.

Members, who have not logged in to Eurex® system since November 26, 2007, and therefore still have the default password stored, are requested to change this password to a personal one by August 29, 2008.

Please note that the newly selected password must be at least eight characters long and must not contain any blanks.
