CCP Release 6.0: Simulation Update Kit 2 and Production Update Kit 1

With this circular Eurex Clearing AG announces the provision of CCP Release 6.0 simulation update kit 2 and production update kit 1 via internet on March 28, 2011.

The update kits contain the following technical improvements:

The "Trade Overview" window was improved for processing large amounts of trades even if no filter was set. In very rare cases, it could happen that the paging does not work correctly, if there is a huge amount of trades in the system. In some situations where the trade inquiry is done without selecting "buy side only" or "sell side only", the turn-over to the next page could fail, although additional trades are available. If you notice this problem on your system the provided update kits should be installed.

Installation of the CCP Release 6.0 simulation update kit 2 and production update kit 1 on all MISSes in the appropriate environments is optional for all CCP participants.

Please note that installation of CCP Release 6.0 simulation update kit 2 is not mandatory for testing the announced CCP Release 6.0 enhancements which will be introduced in production on May 23, 2011 (see Eurex Clearing circular 009/11 of February 7, 2011).

The update kits will be made available in the Member Section on the Eurex Clearing website under the path:

www.eurexclearing.com > Member Section > Releases > CCP 6.0 > Software Kits > Simulation Kits / Production Kits

For direct access click on the following link:
https://www.eurexchange.com/members/releases/ccp60/kits_production_en.html
