Xetra Release 17.0:
Distribution and installation of front-end simulation software, publication of documents

Dear Sir or Madam,

With this circular, we are providing all details about distribution of the mandatory front-end simulation software for Börse Frankfurt (XFRA) for the start of the Xetra Release 17.0 simulation on 11 September 2017. In addition, we published various documents on the internet for download.

Distribution of simulation software

On Friday, 8 September 2017, after close of trading, you will receive the new front-end simulation software for the simulation environment Börse Frankfurt (XFRA). Transmission will take place via FTP to your report nodes.

With Xetra Release 17.0 the GATE software for Börse Frankfurt (XFRA) will remain unchanged, i.e. installation of GATE 3.5 and the corresponding GATE 3.5 Update Kit 3 remain the basic requirements.

The target transfer directories on the Xetra simulation MISSes are as follows:

Oracle Solaris 10 (Sparc):	/opt/gate/transferdir/release62/sun
Oracle Solaris 10 (x86):	/opt/gate/transferdir/release62/x86
Microsoft Windows:	<ftp-root directory>\release62\win

Each Member will receive the simulation kits for Oracle Solaris 10 (Sparc), Oracle Solaris 10 (x86) and Microsoft Windows.

Management Board
Hauke Stars
(Chairperson)
Martin Reck
(Deputy Chairperson)
Cord Gebhardt
Michael Krogmann

To ensure smooth distribution of the kits, please note:

- At least **300 MB** disk space has to be available in the transfer directory on each of your simulation MISSes in the simulation environment (62).
- Make sure that the report MISSes of your Xetra simulation environments are reachable without interruption from Friday evening, **8 September 2017** until Wednesday morning, **13 September 2017** to enable the file transfer.
- Please check that the necessary read and write permission for files and folders are set correctly.

Deutsche Börse will monitor the successful distribution of the kits. In case of any transfer problems, another transfer for the next day will be initiated automatically. In addition, the software will be available for download on the Xetra website www.xetra.com as of **8 September 2017** under the path:

Member Section > Cash Market Member Section >
Cash Market Resources > Software > Xetra 17.0

Installation

Installation of the software on MISSes and workstations is mandatory in order to access the Xetra Release 17.0 simulation as of 11 September 2017. For details about installation, please refer to the "Installation Notes" (readme file) for the Xetra Release 17.0 simulation kit which will be distributed together with the software kits.

After the initial installation, Members have to start the programme "XetraPrepareExchange" and, where necessary, finalise the software settings by means of the "Configuration Utility Tool". For further details, please refer to the "Xetra Release 17.0 Front End Installation Guide" (to be published on 28 August 2017), chapters 4.2 and 4.3.

Publication of documents

In connection with the introduction of Xetra Release 17.0 scheduled for 20 November 2017, we published today the following documents:

Functional:

- Member Simulation Guide
- Checklist Simulation

Technical:

- Network Access to Exchange Applications
- Front-End Access to Exchange Applications

Interfaces:

- Multicast Addresses for Simulation, Advanced Simulation and Production

The *Member Simulation Guide* describes the simulation concept for Xetra Release 17.0. In order to enable a successful simulation, key data and planning criteria for preparation and realisation of Members' simulation activities are defined in this document.

The simulation calendar was published at the same time as the Member Simulation Guide for download under the following path:

Member Section > Cash Market Member Section >
Cash Market Resources > Simulation > Simulation Calendar

The *Checklist Simulation* provides an overview of the necessary preparations in order to participate in the simulation activities for Xetra Release 17.0.

Document *Network Access to Exchange Applications* contains an overview of available connection alternatives and supports Members in selecting and configuring their router.

Document *Front-End Access to Exchange Applications* gives a technical overview of the setup of the various interfaces.

Document *Multicast Addresses for Simulation, Advanced Simulation and Production* provides an overview of multicast addresses for the Enhanced Broadcast Solution Interface and Xetra Market Data Interface for the production, simulation and Advanced Simulation environments.

The documents were published on the Xetra website www.xetra.com under the following path:

Member Section > Cash Market Member Section >
Cash Market Resources > Documentation > Xetra 17.0

Click here to directly access the login screen of the Xetra Member Section:

For any questions you may have or if you require additional information about Xetra Release 17.0, please contact your Group Client Key Account Manager.

Yours faithfully,
On behalf of the Management Board

Frank Horneff
