Summary:

Compliance with the European Market Infrastructure Regulation (EMIR) requires central counterparties (CCPs) to offer at a minimum omnibus and individual client segregation. Eurex Clearing AG (Eurex Clearing) introduced the Individual Clearing Model (ICM) in August 2011 and the Net Omnibus Clearing Model in January 2013.

Effective **16 December 2013**, Eurex Clearing will amend the Elementary Clearing Model (ECM). Clearing Members can then distinguish the assets (collateral) and positions held for the account of their clients (omnibus client segregation) from their own collateral and positions within the ECM using either a value based allocation or asset based allocation method.

With this circular Eurex Clearing provides initial information on the planned solution, the Information Schedule and the preliminary amendments to the Clearing Conditions for Eurex Clearing (Clearing Conditions), based on the version effective 15 July 2013.

Please note that the functions and services introduced with this enhancement will have an impact on all Clearing Members of Eurex Clearing. The ECM relevant reports can be tested in the simulation environment as of 4 November 2013.

Client Asset Protection:
Amendments to the Elementary Clearing Model (ECM)

Compliance with the European Market Infrastructure Regulation (EMIR) requires central counterparties (CCPs) to offer at a minimum omnibus and individual client segregation. Eurex Clearing introduced the Individual Clearing Model (ICM) in August 2011. The ICM provides market participants with individual client segregation. In January 2013 Eurex Clearing launched the Net Omnibus Clearing Model, providing Clearing Members in the United Kingdom (UK) with an omnibus client segregation framework to comply with UK Client Asset Sourcebook (CASS) rules.

Effective 16 December 2013 Eurex Clearing will amend the Elementary Clearing Model (ECM) to comply with omnibus client segregation requirements. Clearing Members will be able to distinguish the assets (collateral) and positions held for the account of their clients (omnibus client segregation) from their own collateral and positions within the ECM using either a value based allocation or asset based allocation method. Additionally, a porting mechanism will be introduced to facilitate the transfer of clients' positions and collateral from a defaulting Clearing Member to a single new Clearing Member.

With this circular Eurex Clearing provides initial information on the planned solution, the Information Schedule and the preliminary amendments to the Clearing Conditions for Eurex Clearing (Clearing Conditions) based on the version effective 15 July 2013. The preliminary amendments to the Clearing Conditions were approved by the Executive Board of Eurex Clearing based on the conceptual changes to the ECM that were approved by the Supervisory Board of Eurex Clearing following the recommendation of the Risk Committee of Eurex Clearing. The final version of the amendments for the ECM will be published prior to the effective date 16 December 2013.

Please note that the functions and services introduced with this enhancement will have an impact on all Clearing Members of Eurex Clearing. The ECM relevant reports can be tested in the simulation environment as of 4 November 2013.

The details for the amendments to the ECM are as follows:

Start of simulation:	November 4, 2013
Introduction date:	December 16, 2013

Main functional and technical changes

Eurex Clearing will amend the ECM to comply with segregation and portability requirements under EMIR. To achieve omnibus client segregation, Clearing Members are able to distinguish client positions (A-Accounts, NCMs and RCs) from their own positions (P-/M-Accounts) using existing functionality. Collateral can be allocated between proprietary (Eligible Assets for Elementary Proprietary Margin) and clients (Eligible Assets for Elementary Omnibus Margin) using either the value based allocation method or the asset based allocation method.

1. Value based allocation method

The value based allocation method will facilitate the allocation of collateral to proprietary positions and client positions within the clearinghouse. This method will be applied by default and does not require a Clearing Member or its clients to submit any additional documents to Eurex Clearing. Clearing Members can continue to use their existing set-up to provide securities collateral to the Clearing Member's pledged securities account at a central securities depository (CSD), i.e. Clearstream Banking AG (CBF), SIX SIS Ltd or Clearstream Banking S.A. (CBL), for their own transactions/positions (Own Transactions) and/or their clients' transactions/positions (Elementary Omnibus Transactions) and cash collateral to Eurex Clearing's central bank account. The collateral is provided by a Clearing Member to its standard/default pool within the Eurex Clearing system,

allocated based on the margin requirements for proprietary and client positions, respectively, and reported to the Clearing Member in a new end-of-day (EOD) report (CD043 ECM: Value Based Alloc. Method).

The report CD043 ECM: Value Based Alloc. Method will also be distributed to Clearing Members who opt for the asset based allocation method; however, it has no relevance for these Clearing Members.

2. Asset based allocation method

The asset based allocation method will facilitate the allocation of collateral to proprietary and client transactions/positions within the CSD and Eurex Clearing's central bank accounts. A Clearing Member uses the set-up of a separate pledged securities account or sub-account at CBF, SIS SIX Ltd or CBL for securities and pool IDs for cash collateral for omnibus clients. The collateral is provided by the Clearing Member, linked to a dedicated collateral pool and reported to the Clearing Member in the EOD report CD042 (Daily Settlement Statement).

For both the value based allocation method and the asset based allocation method use of the collateral management system Xemac[®] to grant pledges or assignments for security purposes remains unchanged.

Amendments to the Clearing Conditions

Attached to this circular are the preliminary amendments to the Clearing Conditions, based on the version effective 15 July 2013. The preliminary amendments to the Clearing Conditions were approved by the Executive Board of Eurex Clearing based on the conceptual changes to the ECM that were approved by the Supervisory Board of Eurex Clearing following the recommendation of the Risk Committee of Eurex Clearing. The final version of the amendments for the ECM will be published prior to the effective date 16 December 2013. Changes to the legal framework are as follows:

1. Changes to the framework for segregation of margin and collateral

The amended ECM offers separation in the recording and accounting of positions and collateral relating to

- the activities of the Clearing Member itself (Own Transactions, Elementary Proprietary Margin and Elementary Proprietary Variation Margin) and
- the activities of the Clearing Member's clients (A-Accounts, NCMs and RCs – Elementary Omnibus Transactions, Elementary Omnibus Margin and Elementary Omnibus Variation Margin)

Positions transacted for proprietary and client accounts continue to be separated in the existing position accounts – P1/P2, M1/M2 for proprietary and A1-A7 as well as A9 (if the Clearing Member is not using the Net Omnibus Clearing Model), NCMs and RCs for clients. Own Transactions and Elementary Omnibus Transactions will be subject to separate Standard Agreements, i.e. Elementary Proprietary Standard Agreement and Elementary Omnibus Standard Agreement, respectively.

Collateral covering proprietary and client positions can be allocated using the value based allocation method or the asset based allocation method, both of which are described above. A Clearing Member can only choose to apply one of the two methods within the Elementary Clearing Model. Variation margin and options premiums will be directly allocated to the account where the transaction/position is booked generating a credit or debit.

At launch, the value based allocation method applies automatically. Clearing Members can opt for the asset based allocation method by submitting new documentation. Further details regarding this documentation will be provided in a separate Eurex Clearing circular planned for the beginning of November 2013.

2. Changes to the framework for portability

The amended ECM will provide a framework for the transfer (porting) of clients' transactions/positions and collateral upon the default of a Clearing Member. The Porting Period commences with (i) the occurrence of an Insolvency Termination Event or (ii) the provision of a Porting Notice. In order for porting to be successful, the following porting prerequisites must be satisfied:

- all clients (A-Accounts, NCMs and RCs) agree on a single new Clearing Member;
- the new Clearing Member agrees to assume all client transactions/positions and client collateral and confirms that all clients, NCMs and RCs have designated it as their new Clearer;
- confirmation is provided by 13:00 (CET) on the business day following an insolvency termination event or publication of the porting notice (end of the Porting Period); and
- any (additional) required Elementary Omnibus Margin or Elementary Omnibus Variation Margin that Eurex Clearing is entitled to, but has not received from the defaulting Clearing Member, is covered by the new Clearing Member.

Porting is effected by (i) a transfer of all rights, obligations and legal title to all client transactions/positions and client collateral to the new Clearing Member (transfer by way of assumption of contract) and (ii) Eurex Clearing making the appropriate changes to its accounts and records.

If the value based allocation method applies, Eurex Clearing will identify certain Eligible Margin Assets in the form of securities in such number and amount reflecting the allocation of collateral to clients (Elementary Omnibus Standard Agreement) to be transferred.

If the asset based allocation method applies, Eurex Clearing will transfer all Eligible Margin Assets in the form of securities that are credited to clients in the pledged securities account.

In both allocation methods, cash margin is provided by way of full title transfer and therefore remains with Eurex Clearing and will only be allocated to the new Clearing Member by way of a change of the relevant records.

Omnibus-segregated clients under ECM will not be offered an option to become an interim participant.

3. Changes to the framework for default management process

If porting is not possible, position liquidation will be handled according to the standard default management process. Separate difference claims will be calculated based on the separate Standard Agreements, one for client positions (A-Accounts, NCMs, RCs) and one for proprietary positions.

Eurex Clearing is entitled to set off any difference claim against the Clearing Member for client business against any difference claim owed to the Clearing Member for proprietary business (but not vice versa). Any excess collateral will be returned to the insolvency administrator for the account of the Clearing Member and clients, respectively.
