Summary:

On June 26, 2012, the annual general meeting of the company MLP AG will decide to pay a dividend of EUR 0.60, which includes the additional dividend of EUR 0.30.

The additional dividend will result in an adjustment of the Eurex options and the Eurex stock futures contract on shares of MLP AG (MLP, MLPF) as already announced on February 29, 2012 via the **Market Supervision Messages** window.

Ex date will be **June 27, 2012**.

This circular contains a description of the adjustment procedure.

MLP AG: Additional Dividend

Measure:
Distribution of additional dividend of EUR 0.30 on shares of the company MLP AG.

Last Cum Trading Day:
June 26, 2012

Ex Date:
June 27, 2012

Affected Products:
MLP, MLPF

Reference to underlying Rules & Regulations:
Contract Specifications for Futures Contracts and Options Contracts at Eurex Deutschland and Eurex Zürich, sections 1.6.7 (2) and 2.6.10.1 (2).

Adjustment of ISIN:
The ISIN of the MLP AG share (DE0006569908) will remain unchanged.

Procedure:

Determination of Adjustment Factor (R-Factor)

The closing auction price of the MLP AG share in the trading system Xetra® on the last cum trading day will be the basis for determination of the R-factor. First, the price will be reduced by the regular dividend. The price resulting from this will serve for determination of the adjustment factor (R-factor).

S1	Closing auction price of the MLP AG share
S2	S1 minus regular dividend
S3	S2 minus additional dividend
R-factor	S3 / S2

Options

1. Adjustment of Strike Prices and Contract Sizes

All existing strike prices will be multiplied by the R-factor.

The contract size will be divided by the R-factor.

The version number of the existing series will be increased by 1.

Adjusted strike prices and contract sizes will be published via the **Market Supervision Messages** window immediately after close of trading on the last cum trading day.

New series with standard contract size 100 and version number 0 will be introduced effective ex date.

All existing orders and quotes will be deleted after close of trading on the last cum trading day.

The adjustment also refers to existing positions in OTC Flexible Options.

2. Exercises

Generally, upon exercise of an adjusted series, cash payment will be made for the fractional part of the new contract size.

For adjusted series as of version 2, deviations in the delivery process might occur. In report RPTTA111 (All Active/Inactive Series), those parts of the contract size are displayed for which cash settlement takes place upon exercise of an adjusted series.

Futures

1. Adjustment of Contract Size and Variation Margin

The adjustment will take place with the same R-factor as for the options.

To adjust the calculation of the variation margin of the following exchange trading day, settlement prices of the last cum trading day will be multiplied by the R-factor.

The new contract size will be calculated as follows:

Contract size new = contract size old / R-factor

All outstanding orders and quotes will be deleted after close of trading on the last cum trading day.

The adjustment also refers to existing positions in OTC Flexible Futures.

2. Introduction of a new Contract

A new futures contract will be introduced on MLP AG shares with standard contract size 100 and new product code MLPG.

The exact introduction date will be published in a separate Eurex circular.

As soon as the new contract is available for trading and there are no more series with open interest in the original contract on MPL AG shares (MLPF), trading in this contract will be put on “HALT” and finally discontinued.

Furthermore, as of June 27, 2012, no new contract months will be introduced in the original contract (MLPF). Existing contract months without open interest will be suspended from trading.

If there is no open interest on the last cum trading day after close of trading in the original contract on MLP AG shares (MLPF), no adjustment will be made and no new contract will be introduced.
