7 September 2015

**Xetra Release 16.0:  
Distribution and installation of front-end simulation software,  
publication of documents**

Dear Sir or Madam,

With this circular, we are providing all details about distribution of the mandatory front-end simulation software for Xetra (XETR) and Börse Frankfurt (XFRA) for the start of the Xetra Release 16.0 simulation on 21 September 2015. In addition, we published various documents on the internet for download.

**Distribution of simulation software**

On Friday, 18 September 2015, after close of trading, you will receive the new front-end simulation software for the simulation environments Xetra (XETR) and Börse Frankfurt (XFRA). Transmission will take place via FTP to your report nodes.

With Xetra Release 16.0 the GATE software for Xetra (XETR) and Börse Frankfurt (XFRA) will remain unchanged, i.e. installation of GATE 3.5 and the corresponding GATE 3.5 Update Kit 3 remains the basic requirements.

Management Board  
Andreas Preuss  
(Chairman)  
Martin Reck  
(Deputy Chairman)  
Cord Gebhardt  
Michael Krogmann

The target transfer directories on the Xetra simulation MISSEs are as follows

**For Xetra (XETR):**

Oracle Solaris 10 (Sparc): /opt/gate/transferdir/release52/sun

Oracle Solaris 10 (x86): /opt/gate/transferdir/release52/x86

Microsoft Windows: <ftp-root directory>\release52\win

**For Börse Frankfurt (XFRA):**

Oracle Solaris 10 (Sparc): /opt/gate/transferdir/release62/sun

Oracle Solaris 10 (x86): /opt/gate/transferdir/release62/x86

Microsoft Windows: <ftp-root directory>\release62\win

Each Member will receive the simulation kits for Oracle Solaris 10 (Sparc), Oracle Solaris 10 (x86) and Microsoft Windows.

To ensure smooth distribution of the kits, please note:

- At least **300 MB** disk space has to be available in the transfer directory on each of your simulation MISSEs in both simulation environments (52/62).
- Make sure that the report MISSEs of your Xetra simulation environments are reachable without interruption from Friday evening, **18 September 2015** until Wednesday morning, **23 September 2015** to enable the file transfer.
- Please check that the necessary read and write permission for files and folders are set correctly.

Deutsche Börse will monitor the successful distribution of the kits. In case of any transfer problems, another transfer for the next day will be initiated automatically. In addition, the software will be available for download on the Xetra website [www.xetra.com](http://www.xetra.com) as of **18 September 2015** under the path:

**Cash Market Member Section > Cash Market Resources >  
Software > Xetra 16.0**

Click here to directly access the login screen of the Xetra Member Section:  
<https://member.deutsche-boerse.com/irj/portal>

## **Installation**

Installation of the software on MISSEs and work stations is mandatory in order to access the Xetra Release 16.0 simulation as of 21 September 2015. For details about installation, please refer to the “Installation Notes” (readme file) for the Xetra Release 16.0 simulation kit which will be distributed together with the software kits.

After the initial installation, Members have to start the programme “XetraPrepareExchange” and, where necessary, finalise the software settings by means of the “Configuration Utility Tool”. For further details, please refer to the “Xetra Release 16.0 Front End Installation Guide” (to be published on 14 September 2015), chapters 4.2 and 4.3.

## **Publication of documents**

In connection with the introduction of Xetra Release 16.0 scheduled for 30 November 2015, we published today the following documents.

Functional:

- Member Simulation Guide
- Checklist Simulation

Technical:

- Network Access to Exchange Applications
- Front-End Access to exchange Applications

Interfaces:

- Multicast Addresses for Simulation, Advanced Simulation and Production

The *Member Simulation Guide* describes the simulation concept for Xetra Release 16.0. In order to enable a successful simulation, key data and planning criteria for preparation and realisation of Members’ simulation activities are defined in this document. The simulation calendar is contained in the attachment to the Member Simulation Guide.

The *Checklist Simulation* provides an overview of the necessary preparations in order to participate in the simulation activities for Xetra Release 16.0.

Document *Network Access to Exchange Applications* contains an overview of available connection alternatives and supports Members in selecting and configuring their router.

Document *Front-End Access to Exchange Applications* gives a technical overview of the setup of the various interfaces.

Document *Multicast Addresses for Simulation, Advanced Simulation and Production* provides an overview of multicast addresses for the Enhanced Broadcast Solution Interface and Xetra Market Data Interface for the production, simulation and Advanced Simulation environments.

The documents were published on the Xetra website [www.xetra.com](http://www.xetra.com) under the following path:

**Member Section > Cash Market Resources >  
Documentation > Xetra 16.0**

Click here to directly access the login screen of the Xetra Member Section:  
<https://member.deutsche-boerse.com/irj/portal>

For any questions you may have about Xetra Release 16.0, please contact Trading & Clearing Services on telephone +49-(0) 69-2 11-1 16 40.

Yours faithfully,  
On behalf of the Management Board

Axel Birk
