3. Review of Mistrade Rules

In their session on February 23, 2005 the Management Boards of the Eurex Exchanges made the decision to streamline the Implementation Regulations for the Handling of Erroneous Entries at Eurex Deutschland and Eurex Zürich (the Mistrade Rules). To simplify the dissemination and communication of Mistrade Ranges, all spread tables relating to these Mistrade Ranges will be communicated via circular and published on the Eurex website **www.eurexchange.com**. The exact specification of the Mistrade Rules is given in the Implementation Regulations for the Handling of Erroneous Entries at Eurex Deutschland and Eurex Zürich (attachment 4). Attachment 5 “Mistrade Ranges” contains the currently valid mistrade ranges.

In attachment 5 “Mistrade Ranges” the spread class of Adidas is correctly listed as 8. In circular 018/05 it was, by mistake, listed as 9.

4. Correction to Fast Market Conditions

The maximum spreads for Regular Market Making (RMM), Permanent Market Making (PMM) and Advanced Market Making (AMM) widen in Fast Market Conditions by 100 percent. This is a correction to the Market Making Obligations (attachment 2) as published in Eurex circular 171/04 and 018/05.

Advanced Market Making at Eurex consists of continuous quotation of a pre-defined set of strikes for a predefined set of expirations as well as response to quote request for all strikes and expirations of a given product. These obligations have to be fulfilled for all products within a pre-defined package.

Committed Quotation Time:

Continuous quotation for an average of 85 percent of the trading period between 08:50 and 17:30 CET (calculated on a monthly average) on each Exchange trading day per calendar month for all expirations up to a maximum maturity (the maturity range). AMMs will be obliged to quote calls and puts in five strikes out of a strike price window of seven strikes around the current underlying price in every expiry within the maturity range; this means ten series have to be quoted in total for every expiry within the maturity range. The strike price window is centered around the current index level, stock price or ETF price for index options, stock options or options on ETFs respectively. Asymmetric quotation is allowed.

At least 0 percent of all quote requests have to be answered, but only up to a maximum of 150 quote requests per day:

Permanent and Advanced Market Making Registration Form

1. Preface

Eurex addresses the following proposal to all market participants interested in the status of Permanent Market Maker (hereafter denoted as PMM) in all fixed income, equity and equity index options listed at Eurex. Eurex also addresses the following proposal to all market participants interested in the status of Advanced Market Maker (hereafter denoted as AMM) in pre-defined packages consisting of equity and equity index options listed at Eurex.

Permanent quotation will be permitted in all fixed income options as well as all stock and index options listed at Eurex.

PMMs are at liberty to choose the fixed income, stock and index options in which they wish to make a permanent market. AMMs, on the other hand, are at liberty to choose the package in which they wish to make a permanent market. However, the fixed income, stock and index options chosen or within the chosen package must be subject to a market making license between Eurex and the member. This registration therefore supplements the Market Maker license signed between Eurex and market making member firms.

Resignation from the responsibilities is subject to the general rules for Eurex Market Making. Members are requested to indicate the options in which they wish to make a permanent market in accordance with this agreement and to sign and return the document to Eurex, Product Design, 60485 Frankfurt, Fax: +49-69-211-1 44 61.

2. Permanent Market Maker and Advanced Market Maker Quotation Obligations and Trading Parameters

The quotation obligations and trading parameters of a PMM or AMM are detailed in the attached document “Market Maker Obligations at Eurex” and have to be fulfilled in their appropriate valid version.
