➲ Front Office / Trading ➲ Middle and Back Office ➲ IT / System Administration	1. Public Inside Market Broadcast Stream - Broadcast Group Product Allocation

1. Product Allocation to the Public Inside Market Broadcast Stream from March 10, 2003

Due to the large number of new stock options introduced with the initiative in the French stock option segment announced in Circular 017/03, it has been decided to amend the group structure of the Public Inside Market Broadcast Stream.

A new group, Group H, will be created. All Dutch stock options will be deleted from their current location in Group G and will be assigned to the new Group H.

The 63 new French stock options will be allocated to Group G, the same group as the current French stock options.

The EXTF options currently assigned to Group Z will be relocated as follows: EXS1 to Group C; EUN2, EXW1 and FRC1 to Group D; XMT to Group F.

These changes will take effect from the start of trading on March 10, 2003 and Attachment 1 gives a full overview of product allocation to the different groups from that date. Please ensure that your systems administrator makes any necessary changes to the Inside Market Broadcast Stream subscription or exclusion list at the appropriate time.

We would like to take this opportunity to remind Members that in the interest of network performance at their front end installation, MISS servers should be configured to subscribe only to those groups of the Public Inside Market Broadcast Stream which are required to support their trading activities. Attention should also be paid to the fact that, in relation to subscription to, or exclusion of, broadcast stream groups, load-balancing between MISSs of a MISS group is also an important factor in efficient front end performance (See section 2.2.2 of the Eurex 6.0 Technical Release Notes published with Circular 059/02).

2. Finnish Midsummer Holiday on June 20, 2003

The table of additional holidays and exchange days with trading and clearing restrictions distributed as an attachment to Circular 116/02 contained an error in relation to the Finnish Midsummer holiday. The Finnish holiday will be on Friday, June 20 in 2003 not June 21st. Please note that, as a result of the holiday, the Last Trading Day for the JUN 03 expiry of the HEX25 Options and Finnish Stock options will be Thursday June 19, 2003. The Trading Calendar published on our web-site www.eurexchange.com under 'Market Place > products > trading calendar > 2003' shows the correct information. The full set of holiday regulations for the holiday on June 20, 2003 will be published in a later Circular.
