Introduction of Equity Options on the Equities of Epcos, Infineon, and Intershop

On 22 February 2000, following the recommendation of the Eurex working committee Equity/Equity Index Products, the Management Boards of the Eurex Exchanges made the decision to introduce new German stock options on the equities of Epcos, Infineon, and Intershop.

The introduction will take place on **20 March 2000**, provided that at least three market makers have agreed to quote each option. Please use the attached market maker application form (Attachment 3) for your application.

Epcos stock became a component of the DAX® on 14 February 2000, in place of Mannesmann. Therefore the introduction of the option on Epcos represents an alignment with the changes to the index constituents of the DAX®.

Infineon stock will start trading on the cash market on 13 March 2000, following one of the biggest German IPOs in the first half of 2000. Due to the market interest, Eurex has decided to introduce the option on Infineon very shortly afterwards.

With the launch of the option on Intershop, Eurex is extending the list of stock options on selected New Market securities following the successful introduction of EM. TV, Mobilcom and Consors in September 1999. The introduction of Intershop is a response to the good increase in turnover and market capitalisation, and the high level of interest in that market segment.
