➲ Front Office / Trading ➲ IT / System Administration	

After completion of the batch run on Wednesday 14 March, 2001 Eurex will distribute a Production Update Kit for Eurex Release 4.1. As the Update-Kit concerns the @X-ceed Java-based Trading application, the delivery will only be made to SUN and NT MISS/Workstation configurations; User Devices and IBM/AIX MISSs are not affected.

Target directories and required free storage space for the software transfer are as follows:

SUN Solaris (MISS):	/opt/gate/transferdir/release00	16 MB+12 MB Windows NT
Microsoft Windows NT (MISS):	<ftp-root directory>\release00	12 MB

This Production Update Kit should be installed by all members who have already installed the @Xceed application delivered on 21 February. Members wishing to install @X-ceed for the first time should only use the kit distributed today. The kit should be installed according to the installation notes in the 'Read-me' file delivered to the appropriate directory in the production environment together with the Kit.

Please forward this circular to your system administrator so that any files no longer required (e.g. old software kits, Theoretical Price Files, reports, etc.) can be removed from the directories before the Update Kit is transferred.

Please make sure that your production environment is connected to the Eurex back end on Wednesday evening, 14 March, 2001 from 22.00 CET onwards.

If you have not received the kit by Friday, 16 March, 2001 please contact our Technical Help-desk on Tel. +49 (0)69-2101-1200.

The Update Kit contains an important patch for the Java-based Trading GUI @X-ceed. A faulty date function in the Trading Filter, which could impede the display of the previous day's trades, has now been corrected.

Installation of the Update Kit is strongly recommended by Eurex.
