Summary:

An update kit for the Eurex Simulation environment will be distributed from Wednesday 10 January, 2001 until Friday 12 January, 2001.

It will contain the Java-based trading GUI for SUN Solaris and Windows NT installations announced in Circulars 041/00 and 067/00.

At the same time, the Simulation environment on all platforms will be brought up to the same level as the Production environment (see Circular 103/00). Therefore, for MISS/WS installations, a GATE Update Kit will be delivered in addition to the Simulation Kit.

System administrators should ensure that sufficient storage space is available in the simulation environment, and that the simulation environment is connected to the Eurex network on **Wednesday evening from 21.00 CET**.

Installation of the update kit is recommended by Eurex.

Distribution of Update Kit for the Simulation Environment

An update kit for the Eurex Simulation environment will be distributed from Wednesday 10 January, 2001 until Friday 12 January, 2001.

This simulation update kit includes the same modifications that were provided in the production update kit distributed on 13 December, 2000 (see Circular 103/00) and brings applications in the simulation environment up to the same level as the production environment. Therefore, for MISS/WS configurations, a simulation update kit for GATE 2.1 is also being delivered.

The new Eurex Release 4.1 Java-based trading GUI for SUN Solaris and Windows NT, announced in previous Circulars, is now being made available to Eurex members, and is included in the simulation update kit for MISS/WS installations. We will announce a date for the production release of the application in a later circular.

The simulation update kit for MISS configurations should be installed according to the installation instructions in the “Read-me” file which will be distributed with the update kit into the appropriate target directory of the simulation environment. Installation of the kits for User Devices and Satellites should follow the procedure described in the installation notes in the transferred file EUREX_SIM_UPD_041_1.TXT.

Target directories and required storage capacity for the software transfer are as follows:

IBM / AIX (UD):	/toff01/data/reports/release01	8 MB
Compaq / OpenVMS (UD):	toff01$:[toff01.data.reports]	10 MB
IBM AIX (MISS):	/usr/lpp/gate/transferdir/release01	11 MB + 24 MB Windows NT
SUN Solaris (MISS):	/opt/gate/transferdir/release01	40 MB + 24 MB Windows NT
Microsoft Windows NT (MISS):	<ftp-root directory>\release01	24 MB

Please forward this circular to your system administrator so that any files no longer required (e.g. software kits, theoretical price files, reports, etc.) can be deleted from the directory before the software is transferred.

Please also be sure that your simulation environment is connected to the Eurex network on Wednesday 10 January from 21:00 CET. If you have not received the update kit by Friday 12 January, 2001 please contact the Technical help-desk on +49 (0)69-2101-1200
