Summary:

After close of trading on **Tuesday 08 January, 2002** Eurex will distribute a production 'Hotfix' for Eurex Release 4.1 by file transfer to the production environment of each member.

The software update will resolve occasional problems observed in the display of private broadcast data in the Own order, Own Quote and Own Trade Overview windows of the Java Trading GUI @X-ceed. Although the reported problems only occur rarely and irregularly – mostly under heavy broadcast load conditions – we recommend that you install the fixes as soon as possible.

System administrators should ensure that sufficient storage capacity is available to receive the transfer, and should ensure that their production environment is available via FTP on Tuesday evening from 21:00 CET.

In addition to the FTP transfer, the software updates, together with corresponding Installation notes will be placed on the Eurex web-site "www.eurexchange.com" under 'info for members > software kits > release 4.1 production' from 09 January, 2002.

Eurex Release 4.1 Production Hotfix

After close of trading on **Tuesday, 08 January, 2002** Eurex will distribute a production 'Hotfix' for Eurex Release 4.1 by file transfer to the production environment of each member.

Please note that the installation of the fix is only necessary if the Release 4.1 version of the Java Trading GUI @X-ceed is used in either the production environment, or in the Eurex 4.1 PSS (Professional Simulation Services) environment.

Target Directory and Storage Space Requirements (Production Environment):

SUN Solaris (MISS):	/opt/gate/transferdir/release00/sun	5 MB
	/opt/gate/transferdir/release00/nt	5 MB
Windows NT (MISS):	<ftp-root directory>\release00\nt	5 MB

Target Directory and Storage Space Requirements (PSS Environment):

SUN Solaris (MISS):	/opt/gate/transferdir/release03/sun	5 MB
	/opt/gate/transferdir/release03/nt	5 MB
Windows NT (MISS):	<ftp-root directory>\release03\nt	5 MB

Please forward this circular to your system administrator, so that any files which are no longer required (e.g. old software kits, theoretical price files, reports, etc.) can be deleted before the file transfer. Please also ensure that your production environment **and** the PSS environment (if applicable) is connected to the Eurex network from 21:00 CET on Tuesday 08 January, 2002. As announced in Eurex Circular 106/01, the file transfer will be sent only to the designated report node of the corresponding environment.

If you have not received the files by Wednesday 09 January, 2002 please contact our Technical Help-desk on Tel. +49 69-2101-1200

The software updates, together with corresponding Installation notes will be placed on the Eurex web-site "www.eurexchange.com" under 'info for members > software kits > release 4.1 production / simulation' on 09 January, 2002.

The Hotfix contains important changes to the version of the Eurex 4.1.Java Trading GUI (@X-ceed) which is currently used in Eurex 4.1 production, and in the Eurex 4.1 permanent simulation. The update will resolve occasional problems observed in the display of private broadcast data in the 'Own Order-', 'Own Quote-' and 'Own Trade-' Overview windows of the Java Trading GUI (@X-ceed). Although the reported problems only occur rarely and irregularly – mostly under heavy broadcast load conditions – we recommend that you install the fixes as soon as possible.

Installation Notes

The two files "etr.jar" and "jvalues21.jar" contain fixes for the version of the Eurex 4.1.Java Trading GUI (@X-ceed) which is currently used in Eurex 4.1 production, and in the Eurex 4.1 permanent simulation.

Before implementing the fixes, please ensure that the most up-to-date version of Eurex 4.1 is installed on the affected MISSs and Workstations. If this is not the case, please install the last available update kit (see Eurex Circular 092/01) before continuing with the instructions below.

Please note that under no circumstances should the supplied files be installed in the current Release 5.0 simulation environment (base91 directory).

To install the fixes in the Eurex 4.1 production environment under SUN/Solaris replace the following two files

/opt/gate/base90/EUREX/atX-ceed/lib/etr.jar

/opt/gate/base90/EUREX/atX-ceed/lib/jvalues21.jar

Under Windows/NT replace the following two files

\opt\gate\base90\EUREX\atX-ceed\lib\etr.jar

\opt\gate\base90\EUREX\atX-ceed\lib\jvalues21.jar

To install the fixes in the permanent Eurex 4.1 simulation under SUN/Solaris replace the following two files

/opt/gate/base93/EUREX/atX-ceed/lib/etr.jar

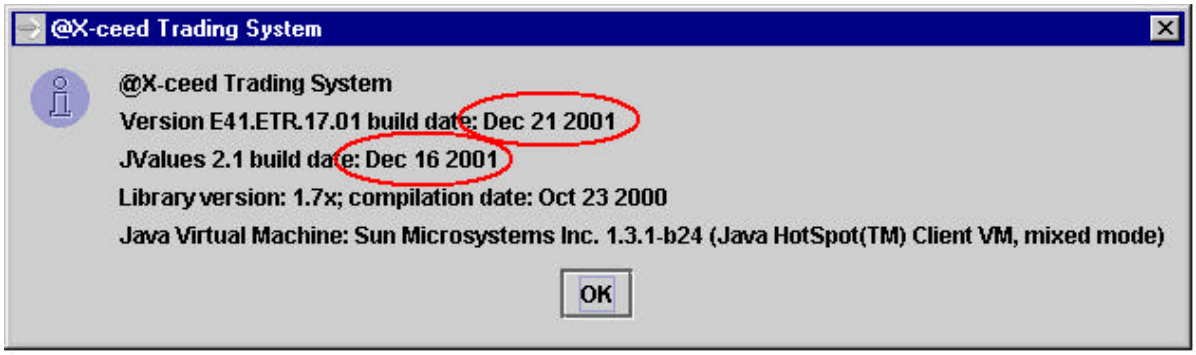

/opt/gate/base93/EUREX/atX-ceed/lib/jvalues21.jar

Under Windows/NT replace the following two files

\opt\gate\base93\EUREX\atX-ceed\lib\etr.jar

\opt\gate\base93\EUREX\atX-ceed\lib\jvalues21.jar

After restarting the @X-ceed trading application, open the “Help” directory in the Main menu, and click “About” . Please check that the two build dates, 21 and 16 December, 2001, are displayed as shown on the screen-shot below.

If either of the two build dates are different from those above, please check that the files supplied have been copied correctly to the defined place in the file system.

If you are unable to access our web-site to download the fixes, or if you have any problems with the download, please contact the Technical help-desk on +49 69-2101-1200.
