Introduction of KRX Derivatives on
Eurex/ KRX Link

April 2022

New Product Offering on Eurex/ KRX Link

KOSPI 200 Weekly Options was added to the family on 28 March 2022*

Eurex and KRX is expanding the product offering of the Eurex/ KRX Link with the new addition of **KOSPI 200 Weekly Options in 2022.**

The overnight KOSPI 200 Options and Mini Futures have been listed on Eurex since 2010 and 2016 respectively. Following the termination of the night session on CME Globex, the KOSPI 200 Futures and Daily USD/KRW Futures were added to the joint link in 2021. The KOSPI 200 Weekly Options was launched in **Q1 2022**.

The KOSPI 200 Weekly Options are one of the most actively traded derivatives on KRX, with an average daily turnover of over 1 million contracts at KRX. The contract will complement the regular KOSPI 200 Options, which has over 281 million contracts traded on the link since 2010.

By including the Weekly Options on the Eurex/ KRX Link, investors have greater flexibility to customize short-term risk exposures in the Korean market around the clock.

Eurex/ KRX Link Product Overview

Additional Information

Contract term

Every contract expires at the end of the exchange day on which it has been concluded on Eurex Exchange. Eurex KOSPI products can be traded on each day, provided that this day is an exchange day at both Eurex and KRX.

Last trading day

The last trading day is the final settlement day. Each trading day is also the last trading day.

Final settlement price

The daily settlement price of the Eurex KOSPI product is also the final settlement price, and is equivalent to the daily settlement price calculated by KRX for the underlying contracts admitted for trading on KRX on the respective exchange day as of the close of trading on KRX.

The cash flow resulting from the variation margin will be paid or received in KRW at a correspondent bank account in Korea.
