Distribution of GATE 2.1 Update Kit for Eurex Release 4.1 Production

From Tuesday 24 April, after the batch run, Eurex will distribute a GATE 2.1 update kit for Eurex Release 4.1 production MISS installations. User Devices are not affected. This update kit will bring the GATE production software up to the same level as the GATE simulation software (see Circular 001/01). The new GATE kit is identical to the one included as part of the Xetra 6.0 production kit to be distributed over the same period, and members with Multi-market installations need only install the Xetra kit.

Target directories and required free storage space for the software transfer are as follows:

IBM AIX (MISS):	/usr/lpp/gate/transferdir/release00	5MB
SUN Solaris (MISS):	/opt/gate/transferdir/release00	5 MB
Microsoft Windows NT (MISS):	<ftp-root directory>\release00	5 MB

The Simulation Update Kit should be installed according to the installation notes in the ‘Read-me’ file delivered to the appropriate directory in the production environment together with the kit. Please forward this circular to your system administrator so that any files no longer required (e.g. old software kits, Theoretical Price Files, reports, etc.) can be removed from the directories before the update kit is transferred.

Please make sure that your production environment is reachable by FTP on Tuesday evening, 24 April, 2001 from 22.00 CET onwards.

If you have not received the kit by Friday, **27 April, 2001** please contact our Technical Help-desk.

Please note that the installation of this kit before **14 May, 2001** is mandatory and Eurex advises that members complete the installation as soon as possible.

Update of the Common Front End Sizing Guidelines

The Common Front End Sizing Guidelines document has been updated with the guidelines for the support of the internet workstations and Equity CCP clearing. In addition, a new router type (CISCO 1720) has been classified as ‘supported’. The updated version will be available on our web-site “”www.eurexchange.com” under ‘info for members > manuals > Production Manuals – Release 4.1 MISS’ from tomorrow.
