Availability of Extended VALUES API Developer's Kits

Dear Sir or Madam,

We are pleased to announce that Eurex has published extended versions of the VALUES API Developer's Kits for all supported Release 3.0 platforms, including OpenVMS. These have replaced the previous versions of the Developer's Kits and are available to download from the Eurex web-site ("www.eurexchange.com" Entrance Hall / Access to Eurex / Bullet Point "Technical Infrastructure").

The extended Developer's Kit covers a wider range of application requests especially for the purpose of Back-Office processing. Broadcasts have also been added.

A new version of the corresponding documentation has also been published in the same area of the web-site.

Members should be aware that the OpenVMS version of the kit can only be 'Unzipped' on an OpenVMS system.

If you have any questions, the Eurex Member Readiness team on Tel. +49 (0)69 2101-1700 will be pleased to assist you.

Yours sincerely,

Jürg Spillmann

Hartmut Klein
