Supported Versions of the OpenVMS Operating System for Year 2000 Simulation and Eurex Release 3.0

Dear Sir or Madam,

A Year 2000-compliant operating system is a pre-requisite for successful participation in the forthcoming 'Year 2000 Overall Simulation 1' scheduled for May and June this year, as well as for Eurex Release 3.0. For OpenVMS User Devices and Satellites, Eurex will support both of the following Year 2000-compliant operating system versions:

1. OpenVMS Version 6.2

   Plus Patches: ALPCLUSIO01_062
   ALPY2K02_062

   Installation of the first patch is a pre-requisite for installation of the second.

OR

2. OpenVMS Version 7.1-2

As already stated in the Release 3.0 Sizing Guidelines for the new front end, only OpenVMS Version 7.1-2 will be supported for the MISS architecture.

In order to ensure a smooth Year 2000 Overall Simulation 1 for your institution, please make sure that the purchase and installation of the appropriate operating system version are completed in good time.

If you have any questions, our technical help-desk on Tel. +49-(0)69-2101-1200 will be pleased to assist you.

Yours sincerely,

Jürg Spillmann Hartmut Klein
