

# ETF Options

## WE'VE GOT OPTIONS. YOU'VE GOT CHOICE.

**Eurex offers the broadest range of ETF options on equities, fixed income and commodities, enabling investors to hedge their ETF portfolios, generate additional income or replicate exposure.**

## FROM ACTIVE TOWARDS PASSIVE FUND MANAGEMENT

The European ETF market is the fastest growing asset class of this decade. This trend, which is supported by European regulation, is expected to continue as European based investors are migrating their portfolios to UCITS compliant ETFs. With our reliable T7 trading architecture, Europe's largest member base and the broadest choice of ETF options, Eurex has become the go-to market for ETF options with on screen and block liquidity from a wide range of market participants.

In the equity ETF segment, investors can trade four futures and 21 different options on the benchmarks of major developed markets such as the EURO STOXX 50®, MSCI Europe, MSCI World and S&P 500, as well as iShares ETFs on the emerging markets such as MSCI EM and MSCI Brazil. In the fixed income ETF segment, Eurex has listed options on iShares USD Corporate Bonds, iShares USD High Yield and iShares J.P. Morgan USD Emerging Markets Bond as well as iShares USD Treasury Bond 20+yr UCITS ETFs, and on the Euro side iShares Core EUR Corporate Bond and iShares EUR High Yield Corporate Bond ETFs. In the commodities ETF segment, investors can trade futures and options on WisdomTree gold and oil funds, futures and options on Xetra-Gold®, as well as options on iShares gold and silver.

The iShares Physical Gold Options launched in May 2018 and have traded over 15 million contracts (equivalent to over EUR 42 billion) in the first two years of listing.

## What are the key benefits?

### On screen liquidity and physical delivery

Tradable volume of 3m notional on-screen for major benchmark ETFs. More volume is always available with a Request for Quote to the designated market makers. ETF options are settled physically.

### Option strategies

The physical settlement of ETF options allows an exact implementation of your strategy in combination with the underlying without the additional spread costs of a possible cash-leg transaction.

### Central Counterparty and margin efficiency

Eurex Clearing guarantees a secure settlement as Central Counterparty and clients benefit from cross margin efficiencies.

## Contract specifications

Product name	Underlying ticker	Currency	Eurex contract codes	Contract size	Tick size	Minimum block size	Exercise	Maturity (months)
