Summary:

Following the batch on Wednesday 30 May, 2001, Eurex will distribute an Update Kit for both the Production and Simulation environments for Eurex Release 4.1. The delivery will be made only to MISS/Workstation installations (IBM AIX, SUN Solaris, Microsoft Windows/NT).

The kit incorporates a number of technical optimizations of the system.

System administrators should ensure that sufficient storage space is available in both the Production and Simulation environments before the update kits are transferred, and that both environments are reachable via FTP on Wednesday evening.

Eurex recommends that both Update Kits are installed as soon as possible after receipt.

Distribution of Production and Simulation Update Kits for Eurex Release 4.1

Following the batch on Wednesday 30 May, 2001, Eurex will distribute an Update Kit for both the Production and Simulation environments for Eurex Release 4.1. The delivery will be made only to MISS/Workstation installations (IBM AIX, SUN Solaris, Microsoft Windows/NT).

Required free storage space and target directories for the software transfer are as follows (**XX** = 00 for Production, and 01 for Simulation environments):

IBM AIX (MISS):	/usr/lpp/gate/transferdir/release**XX**	20 MB + 22MB Windows NT
SUN Solaris (MISS):	/opt/gate/transferdir/release**XX**	38 MB + 22MB Windows NT
Microsoft Windows NT (MISS):	<ftp-root directory>\release**XX**	22 MB

The Simulation Update Kit should be installed according to the installation notes in the 'Read-me' file delivered to the appropriate directory in each environment together with the kit. Please forward this circular to your system administrator so that any files no longer required (e.g. old software kits, Theoretical Price Files, reports, etc.) can be removed from the directories before the update kit is transferred.

Please make sure that each environment is reachable by FTP on Wednesday evening, 30 May, 2001 from 22.00 CET onwards.

If you have not received the kit by Friday, 01 June, 2001 please contact our Technical Help-desk.

The Release 4.1 Update Kit includes the following improvements:

X-tract Help function

The X-tract help functions have been extended.

Position Transfer

With the updated version, position transfers can be entered with six-digit quantities.

Font Selection on SUN

The font selection functionality in the Java trading GUI (@X-ceed) on SUN systems is now available.

Quote Overview

The problem with the update of the Own Quote Overview window, which occurred under certain circumstances, has been resolved in the new version.

Eurex recommends that both Update Kits are installed as soon as possible after receipt.
