As announced in the Technical Release Notes attached to Eurex Circular 027/00 the Connection Test for Eurex Release 4.0 production (User Device and MISS) will take place on Saturday 24 June 2000. However, please note that contrary to the times published in the Release Notes, the production environment will be available for the tests to be carried out between 15:00 and 18:00 CET. The Connection Test is required to ensure a smooth start to Eurex 4.0 Production on Monday 26 June 2000.

In this respect we would ask you to return the attached Fax reply by 19 June 2000 informing us of the name of an individual responsible for the Connection Test at your institution. Please include a telephone or Fax number at which the named contact person can be reached at all times during the test period.

The person responsible must have the authorisation to log into the appropriate Eurex applications in order to check the information published by Eurex on the Newsboard (Screen D050) or Market Supervision window.

Please note that, as with previous releases, the Release 4.0 software kit must be installed in all front end systems, including cases where backward compatibility of the member interfaces definitions is used. Assuming the Connection Tests are successful for the membership in general, trading will start on Monday 26 June 2000 with the Release 4.0 software. Front ends which still have Release 3.0 software installed will not be able to connect. **All members are therefore strongly recommended to take part in the Connection tests.**
