Eurex Release 10.0: Distribution of Update Kit 2 for Simulation, additional Information concerning new Products in the Simulation Environment and Capital Adjustment for one Stock Option

1. Distribution of Eurex Release 10.0 Update Kit 2 for Simulation

After close of trading on October 26, 2007, Eurex will distribute update kit 2 for the Eurex Release 10.0 simulation and highly recommends to install the update kits on all MISSes and workstations.

The update kit contains several functional and technical improvements as well as BESS and VALUES changes and can be used in simulation from October 29, 2007 onwards. Although the update kit is not mandatory its installation is highly recommended to take advantage of the improvements during the Eurex Release 10.0 member simulation. Please note that support can only be provided on the basis of the most recent software version.

The update kit will be transmitted to Eurex participants via File Transfer Protocol (ftp) on Friday, October 26, 2007, after 21:00 CET. The software will only be sent to the registered report nodes. In parallel, the kits will be made available for download from the Eurex website under the following path:

www.eurexchange.com > Member Section > Releases > Eurex 10.0 > Software Kits > Simulation Kits

Please ensure that the simulation environment is connected to the Eurex® network on Friday October 26, 2007 from 21:00 CET onwards and that the following target directories have a total space capacity of approximately 50 MB for the data transmission:

- SUN Solaris (MISS): /opt/gate/transferdir/release01
- Windows (MISS): <ftp-root directory>\release01

The simulation kit should be installed according to the instructions contained in the “readme” file, which will be sent together with the kits to the target transfer directory.

If you have not received the update kit for the simulation of Eurex Release 10.0 by Tuesday, October 30, 2007, please contact the Customer Technical Support on +49-69-211-1 12 00.

Should you experience difficulties logging in to the Member Section, please contact the Member Services & Admission team on telephone +49-69-211-1 17 00.

2. Additional information concerning new products in the simulation environment

To provide members the opportunity to gain experience in the handling of the new feature “Product Grouping and Product Group Assignment”, the products UBSG and NOAG will be setup up in the simulation environment.

The product UBSG will be available in simulation from November 1, 2007 onwards (Product Group: SNSFSC) and the product NOAG from November 8, 2007 onwards (Product Group: ENSFSE).

3. Capital Adjustment for one stock option in the simulation environment

As requested by members a Capital Adjustment for the stock option NOVN will be executed on October 30, 2007.

Frankfurt, October 19, 2007
