Summary:

On January 28, 2005 Eurex will publish the Order Handover Tool (HOT) version 1.1 software kits for use with the Eurex and Eurex US simulation.

The Order Handover Tool (HOT) is a VALUES-based GUI application that supports the transfer of regular orders between Eurex and Eurex US in contracts listed on both systems.

Please note that the software kits will only be made available for download from the Eurex website under the following path:

www.eurexchange.com > Member Section > Software Kits > Order Handover Tool (HOT).

The updated versions of the user documentation and installation guide will also be made available from the Eurex website under:

www.eurexchange.com > Member Section > Documentation/Manuals > Order Handover Tool (HOT) > Functional Manuals (User Guide) or > Technical Manuals (Installation Guide).

Should you experience difficulties logging in to the Member Section, please contact our Customer Support Team on telephone number +49-69-211-1 17 00.

Eurex and Eurex US Simulation: Order Handover Tool (HOT)

On January 28, 2005 Eurex will publish the Order Handover Tool (HOT) version 1.1 software kits for use with the Eurex and Eurex US simulation.

The Order Handover Tool (HOT) is a VALUES-based GUI application that supports the transfer of regular orders between Eurex and Eurex US in contracts listed on both systems.

Version 1.1 of the Order Handover Tool (HOT) software now offers the following new features:

- Transfer of orders in either **Direct Mode** or **Indirect Mode**.
    - Direct Mode - transfers orders from the source system to the destination system and requires a login to both exchanges.
    - Indirect Mode - transfers orders via a transfer-file for customers that are not permitted to login into both exchanges. The orders are exported into a file during one login session on the source system (for example the orders are deleted from the system and written to a file) and are imported from this file within another login session (for example the orders are read from the file and entered to the destination system). These actions no longer need to be performed by the same trader or at the same time.
- Enhanced selection facilities for the order transfer:
    - Introduction of a profile selection facility to display orders of a group of products on a transfer window.
    - Introduction of a Transfer Filter window for an enhanced dedicated selection of orders to be displayed on the transfer windows.
    - Order tagging in the **Source Own Order Overview** window. Selection/de-selection of the respective orders for transfer processing by double-clicking enabling an easy selection of single orders.
- Enhanced error handling facilities. Addition of a button to the **Open Transfer Items** (OTI)/**Open Export Items** (OEI) window to re-enter orders in the source system.
- Display of additional free format text fields in the **Transfer Audit Trail** (TAT) window.

The software kits can be used to either perform an initial installation of the Order Handover Tool (HOT) software or to upgrade an existing version 1.0 installation to the new version. The **readme** file containing the installation details will be published together with the software kits.

Please note that the software kits will only be made available for download from the Eurex website under the following path:

www.eurexchange.com > Member Section > Software Kits > Order Handover Tool (HOT).

The updated versions of the user documentation and installation guide will also be made available from the Eurex website under:

www.eurexchange.com > Member Section > Documentation/Manuals > Order Handover Tool (HOT) > Functional Manuals (User Guide) or > Technical Manuals (Installation Guide).

Should you experience difficulties logging in to the Member Section, please contact our Customer Support Team on telephone number +49-69-211-1 17 00.
