

# Bitcoin ETN Futures

**The introduction of Bitcoin ETN Futures marks the first step in Eurex' portfolio of cryptocurrencies.**

## TRADE AND CLEAR BITCOIN LIKE ANY EUREX PRODUCT

With Bitcoin ETN Futures\* traded in euros, Eurex enables participants to trade on the Bitcoin performance in a simple and fully regulated manner.

These futures offer direct exposure to the price of Bitcoin – the cryptocurrency with the highest market capitalization – while remaining in a familiar and regulated financial infrastructure.

A Bitcoin ETN Future represents 1,000 shares on the BTCetc Exchange Traded Note (ETN) that is backed by Bitcoin.

These transparent and centrally cleared futures are fully collateralized and redeemable in Bitcoins. Other options are to sell the ETNs via Xetra or to hold the position. All solutions provide exposure to the targeted Bitcoin cross rate.

\* Futures on BTCetc – ETC Group Physical Bitcoin.

## What are the key benefits?

**These futures offer exposure to Bitcoin.**

### Trading on EU regulated markets

Trading the future and the underlying takes place on regulated markets (EUREX/XETRA).

### Centrally cleared

Central clearing significantly reduces settlement risks. It also increases transparency and highlights the fact of full regulation.

### Trusted and familiar infrastructure

Trading, clearing and settlement take place in a traditional financial infrastructure. No crypto wallet or blockchain is necessary.

### Options to switch position into Bitcoin via ETN

The underlying can be redeemed in either Bitcoin or Cash.
