Content may be most important for:	**Attachments:**
➲ All Departments	None

On Friday, **November 11, 2005**, after close of trading, Eurex will transmit a software fix for the Eurex Release 8.0 production environment to address the issue of duplicate broadcasts in the Single Leg Inside Market Broadcast.

We urgently recommend that the software fix be installed on all Eurex 8.0 production MISSes.

The software fix will be available for SUN Solaris as well as for Microsoft Windows. The following file will be transmitted per file transfer to the respective production-specific environment of all participants:

- SUN Solaris: eurexr80_hf20051111.tar.Z
- Windows: eurexr80_hf20051111.zip

In preparation of the data transfer, system administrators are requested to make sufficient storage capacity (at least 2 MB) available in the production environment and make sure that the environment can be reached on Friday, November 11, 2005, after 20:00 CET. Before installation of the replacement file, a back-up copy of the old version should be made.

Details of the installation are contained in the “Release Installation Notes” which will be transmitted as a “Read-me” file, together with the software fix, to the directories specified in the following for the data transfer:

- SUN Solaris: /opt/gate/transferdir/release00
- Microsoft Windows: <ftp-root-directory>\release00

Additionally, the software fix will be made available for download from the Eurex website under:

www.eurexchange.com > Member Section > Software Kits > Eurex 8.0 Production

Please forward this circular to your system administrator.

If you have any questions or request further information, please contact the Customer Eurex Technical Helpdesk at tel.: +49-69-211-1 12 00.
