With this circular we are pleased to inform you about the enhanced test facility of the connection to the Eurex production environment.

The first trading day of a week as of **May 17, 2004**, the Eurex system will be available for connection test purposes as early as 02:00 CET. Between 02:00 and 07:00 CET a test message will be transmitted every minute to the “Market Supervision Messages” window of the Eurex GUI.

The text of this message is: “Startup Msg. 0001” and has consecutive numbering. These test messages will not be shown in the history of Market Supervision messages.

These minute-by-minute messages will be transmitted via VALUES API and allow Eurex participants and vendors to monitor the availability and process function of their systems by connecting to the production environment of the Eurex system well in advance of start of trading.

Should you require further details, please do not hesitate to contact Eurex Technical Helpdesk at +49-69-211-1 12 00 (phone), +49-69-211-1 12 01 (fax) and e-mail: eurex-help@eurexchange.com.
