On March 10, 2004, the Management Boards of the Eurex Exchanges decided to set up an Access Point in Gibraltar in response to the ever increasing number of trading locations in this region. This Access Point is expected to be operational in July 2004.

All members trading out of Gibraltar will be contacted by our staff during May in order to prepare the migration of lines from the Madrid Access Point to the new Gibraltar Access Point. We would like to ask all members concerned to give their full support to this migration.
