A software patch in the form of a replacement file which corrects the average trade price in *the Own Trade Overview* window of the current Eurex Release 7.0 production software, is available on the Eurex website under **www.eurexchange.com > Member Section > Software Kits > Eurex 7.0 Production**.

All Members, who work with the @X-ceed trading application, should replace the existing "EurexGUI.jar" on all MISS servers and workstations which are used to run the @X-ceed application in the production environment.

In order to replace the file please proceed as follows:

1. Make a backup copy of the current version of the "EurexGUI.jar" file prior to replacing it so that the existing file can be restored in the event of unforeseen problems with the new version.
2. Please make sure that the @X-ceed and @X-tract applications have been closed before you update the file.
3. Download the appropriate archive (eurexr70_hf20041026.zip for Windows 2000/XP or eurexr70_hf20041026.tar.Z for Solaris) from the Eurex website and decompress it.
4. To implement the patch for Sun Solaris or Windows, please replace the appropriate file with the new version:

   <Gate_Drive:>/opt/gate/base90/EUREX/GUI/lib/EurexGUI.jar (Windows)

   \opt\gate\base90\EUREX\GUI\lib\EurexGUI.jar(Solaris)

For Sun systems, please make sure that the owner and file privileges match the original.

If you experience any difficulties installing or have any questions regarding the software patch, please contact the Technical Help Desk at +49-69-211-1 1200.

If you have difficulties logging into the member section, please contact Customer Support at +49-69-211-1 17 00.
