Dividends Become Tradable: With Dow Jones EURO STOXX 50® Index Dividend Futures

As the first exchange worldwide, Eurex launched a futures contract on the dividends of the Dow Jones EURO STOXX 50® Index on June 30, 2008. In contrast to the existing range of derivatives on the Dow Jones EURO STOXX® Select Dividend 30 and DivDAX® indexes, which track the performance of index constituents selected on the criteria of highest dividend yield, the dividends themselves – distributed by the Eurozone's top 50 companies – form the underlying for the new product. With the new futures contract, market participants will be able to create strategic positions on the isolated dividend flows of the benchmark Dow Jones EURO STOXX 50® Index.

Key Figures Jun (insert)

Given the significant impact that any deviation of actual dividend payment from dividend forecasts may have on the pricing of derivatives, there is considerable demand for tools to manage such dividend risk: Around EUR 1 billion worth of index dividend swaps are reportedly traded in the over-the-counter market each day. The bulk of such contracts is based on the Dow Jones EURO STOXX 50® Index.

The new dividend futures are an efficient tool to manage the dividend component of the Eurozone benchmark index. Thanks to its standardized features and maximum pricing transparency, plus the elimination of counterparty and credit risks via Eurex Clearing, the new Eurex product will be a perfect complement to existing over-the-counter contracts.

Transparent Calculation by STOXX Ltd. Enhances Pricing Stability

The calculation of OTC dividend derivatives has so far lacked any standardized format, which led to recurring discussions as to which of the payments made by a company to its shareholders should actually be considered. The new Eurex futures contract, however, is based on the calculations performed by STOXX Ltd. itself, on the basis of a clearly defined set of rules including the specification which types of dividend will be considered in the pricing process. All ordinary gross dividends will be taken into account, whereas special dividends, return of capital payments, or similar distributions are excluded to the extent that STOXX Ltd. makes adjustments to the underlying Dow Jones EURO STOXX 50® Index. Where STOXX Ltd. has adjusted the Index for only part of a gross dividend, the unadjusted part will be incorporated into the final settlement value of the future.

The dividend payouts are translated into index dividend points. The Final Settlement Price at contract maturity is equivalent to the cumulative gross dividends distributed by the Dow Jones EURO STOXX 50® Index constituents over the contract period.

The Dow Jones EURO STOXX 50® Index Dividend Futures contracts are each based on a period of one year, maturing on the third Friday in December in line with Eurex's established index futures maturity. Seven different contracts are available for trading at any time.

Dow Jones EURO STOXX 50® – the Most Actively Traded Eurozone Index

The new dividend futures contract is based on the Dow Jones EURO STOXX 50® Index universe. The underlying Eurozone benchmark index comprises the 50 most important blue chip stocks from Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal and Spain. The weighting of the index is based on the free float: The weight of each constituent in the index is thus based only on those shares which are freely available for trading, whereby the weighting of each individual constituent must not exceed ten percent of the overall index capitalization. The index composition is reviewed once a year in September, and adjusted if necessary. Futures and options on the Dow Jones EURO STOXX 50® are the world's most heavily traded EUR-denominated equity index derivatives.

Straightforward Implementation of Investment and Arbitrage Strategies

Many market participants seek to actively manage the dividend risk exposure of their positions. The pricing of long-term index options, for example, can be affected significantly by changes in dividend forecasts. Other market players are looking to capitalize on additional trading opportunities arising from isolating the dividend streams: It is the potential deviation of actual dividend payment from earlier dividend forecasts that opens up attractive profit potential to them. The new Eurex equity index dividend futures can be used to implement a large variety of dividend-induced strategies in an efficient way, and with maximum pricing stability and minimum settlement risk.

Block-Trading for Index Dividend Futures

The new dividend futures can also be traded outside the Exchange order book, through the Eurex OTC Block Trade facility offering market participants benefits such as low-cost straight-through processing and the elimination of counterparty and credit risk – just like in orderbook trading. The minimum block trade size is one contract.

Contract Specifications: Dow Jones EURO STOXX 50® Index Dividend Futures

	Futures
Contract Standard	Dow Jones EURO STOXX 50® Index dividends (Dow Jones EURO STOXX 50® DVP): the ordinary gross dividends (cash dividends) declared and paid by each individual constituent of the underlying Dow Jones EURO STOXX 50® Index, expressed in index points.
Contract Value	EUR 100 per index dividend point
Price Quotation	In points, with one decimal place
Minimum Price Change	0.1 index points, equivalent to a value of EUR 10
Settlement	Cash settlement
Contract Months	The seven nearest annual maturities of the December cycle are available at any time.
Last Trading Day	The third Friday of each contract month, if this is an exchange trading day; otherwise, the exchange trading day immediately preceding that Friday.
Trading Hours	08:30–17:30 CET (12:00 CET on the Last Trading Day) 08:30–18:30 CET for OTC Block-Trading

For detailed contract specifications of all equity index dividend derivatives, please refer to the Eurex website at **www.eurexchange.com > Trading > Products > Equity Index Dividend Derivatives**.

Eurex to Expand its Successful Sector Index Product Segment

In August, Eurex will expand its growing segment of sector index derivatives by adding USD-denominated global sector futures, while also covering the European real estate sector with futures and options for the first time from September. The initiative addresses the growing forces of globalization, along with the trend towards ever broader sector coverage. At the same time, it will help Eurex to strengthen its position as the worldwide leader for sector derivatives.

Starting on August 18, 2008, Eurex will launch futures on the five global sector indexes Dow Jones Banks Titans 30, Dow Jones Insurance Titans 30, Dow Jones Oil & Gas Titans 30, Dow Jones Telecommunications Titans 30 and Dow Jones Utilities Titans 30. Each index comprises the 30 largest companies of the respective sector. Also on August 18, a USD-denominated futures contract on the Dow Jones Global Titans 50 Index℠ will be launched, as a counterpart to the already existing EUR-denominated futures.

All 19 Super Sectors Covered

In addition, on September 22, 2008, Eurex will also launch futures and options on the Dow Jones EURO STOXX® Real Estate and Dow Jones STOXX® 600 Real Estate indexes. The underlying real estate equity indexes for the Eurozone and pan-European area, respectively, will be calculated by STOXX as independent indexes as of September. The new real estate derivatives will be added to the existing Market-Making schemes for sector index futures or sector index options.

With the launch of its new products in September, Eurex will cover all 19 super sectors, which are defined according to the internationally accepted Industry Classification Benchmark (ICB). In addition, the Banks, Oil & Gas, Insurance, Telecommunications and Utilities sectors all include companies that are worldwide leaders in their respective industry. Eurex is therefore the first exchange to offer hedging opportunities for global sectors worldwide.

Market Leader with 40,000 Contracts Daily

Since the introduction of the first Eurex sector products back in 2001, trading volumes in these products have been constantly on the rise, helping Eurex to gain a leading market position in this segment. Meanwhile, the last two years have seen an increasing shift of investor focus from the Eurozone to the pan-European area.

Over the first six months of 2008, a total of almost five million contracts changed hands. Open interest in the Eurex sector futures and options currently stands at roughly 544,000 contracts, which is approximately EUR 9 billion in nominal value terms.

The new contracts will be settled in cash, in line with the sector derivatives already existing. The maturity dates of the futures contracts are also in March, June, September and December. In terms of contract size, the new sector futures and options have been designed along the same lines as the successful European sector products already existing: One tick of the Sector Titans and Real Estate derivatives is equivalent to a value of USD 10 and EUR 5, respectively.

Contract Specifications: Futures on Dow Jones Sector Titans Indexes/ the Dow Jones Global Titans 50 Index℠

Contract Standard	Dow Jones Banks, Insurance, Oil & Gas, Telecommunications and Utilities Titans 30 Indexes℠; Dow Jones Global Titans 50 Index℠ (USD).
Contract Value	USD 100 per index point
Settlement	Cash settlement, payable on the first exchange trading day immediately following the Last Trading Day.
Price Quotation	In points, with one decimal place
Minimum Price Change	0.1 of a point, equivalent to a value of EUR 10
Contract Months	The three successive quarterly months within the March, June, September and December cycle.
Final Settlement Price	Value of the Dow Jones Sector Titans Indexes/Dow Jones Global Titans 50 Index℠ (USD), based on the average of the respective index values calculated between 16:50 and 17:00 CET.
Last Trading Day	The third Friday of each contract month, if this is an exchange trading day; otherwise the exchange trading day immediately preceding that day. Trading in the maturing contracts closes at 17:00 CET.

Contract Specifications: Futures and Options on the Dow Jones EURO STOXX® Real Estate/ Dow Jones STOXX® 600 Real Estate Indexes

Contract Standard	Dow Jones EURO STOXX® Real Estate Index; Dow Jones STOXX® 600 Real Estate Index.
Contract Value	EUR 50 per index point
Settlement	Cash settlement, payable on the first exchange trading day immediately following the Last Trading Day.
Price Quotation	In points, with one decimal place
Minimum Price Change	0.1 of a point, equivalent to a value of EUR 5

Sharp Rise in Trading Volume for Single Stock Futures

During the first half of 2008, Eurex Single Stock Futures saw another strong increase in trading volumes, up 200 percent over the same period of last year. On aggregate, more than 108 million contracts changed hands in this segment for the year to the end of June, compared to 36 million contracts over the first six months of 2007.

With a share of approximately 55 percent in the key European markets, Eurex continues to be the leading marketplace for Single Stock Futures in 2008.

Single Stock Futures: Traded Contracts & Open Interest (October 2005–June 2008)

Enhanced Order Book Liquidity Thanks to Designated Market-Making

Since March 1, 2008, Eurex has been promoting the market for Single Stock Futures through a special incentive scheme, where Market Makers are committed to ensure basic order book liquidity for the key components of the Dow Jones EURO STOXX 50® and DAX® benchmark indexes. With these Market Makers permanently quoting prices, smaller-scale institutions and private investors in particular are able to benefit from the advantages of this exchange-traded product. In addition, the order book significantly contributes to enhanced price transparency of the overall Single Stock Futures market. Effective July 1, 2008, Eurex has expanded the scope of this scheme to also include the components of the SLI Swiss Leader Index®.

Lower Trading Fees and Fee Caps Make Trading More Attractive

As of July 1, 2008, trading in this segment will become even more attractive thanks to lower fee caps for OTC Block Trades and reduced trading fees for exchange and OTC trades in Single Stock Futures. (For additional details, please refer to the June 2008 edition of Xpand.)

53 New Single Stock Futures

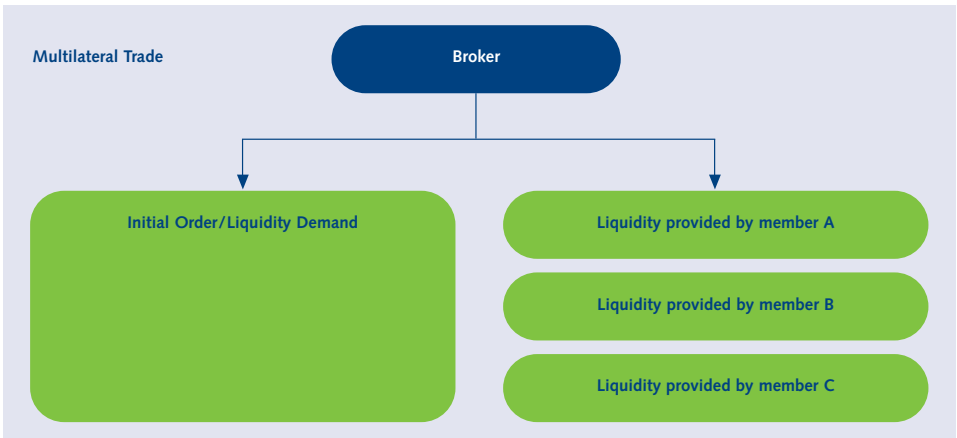

July has also seen an expansion of the Eurex product portfolio, with 53 new Single Stock Futures being added. Therefore, Eurex now offers Single Stock Futures on a total of 650 stocks from 17 countries, denominated in four different currencies (CHF, EUR, GBP and USD).

For detailed contract specifications, please refer to the Eurex website at **www.eurexchange.com > Trading > Products > Equity Derivatives > Single Stock Futures**. For any further information, please feel free to contact Dr. Weiwei Wang on T +49-69-211-1 72 62, e-mail: Weiwei.Wang@eurexchange.com.

OTC Service Offering – Part 1: Multilateral Trade Registration: Optimized Functionality With Lower Costs

Eurex was one of the first exchanges that implemented CCP services for OTC-negotiated transactions when it introduced the OTC Trade Entry facility more than ten years ago. On July 1, 2008, Eurex further enhanced its OTC services by introducing the Multilateral Trade Registration functionality for block trades in equity options. Xpand will present the complete OTC service offerings in a series of articles starting with the latest functionality launch.

The Multilateral Trade Registration (MTR) facility allows the entry of block trades with one buyer or seller and several counterparties – instead of entering separate bilateral block trades. The broker entering the trade does not have to be counterparty to the trade itself, but may enter the half trades directly for the actual beneficiary owners.

Higher Efficiency – Lower Costs

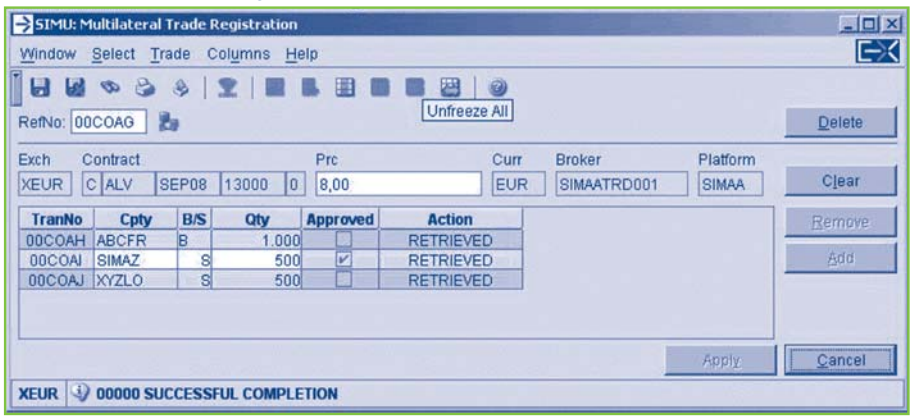

MTR allows market participants to trade particularly large orders more efficiently. In addition, since July 1, the reduced block trade fee caps for equity options have also applied to all partial trades entered via the Multilateral Trade Registration facility, thereby providing a real cost benefit for members trading equity options: Regardless of the order size, exchange fees (for the initial order) apply only up to the fee cap, as large orders do not have to be split up into several bilateral block trades in which the fee cap is applied to every single trade.

Example:

- An order over 15,000 contracts in ALV is executed on the A-Account against three counterparties, each contributing 5,000 contracts.
- Pior to July 1, the order would have needed to be executed in three separate block trades with a trade size of 5,000 contracts each, resulting in 3 × EUR 400 = EUR 1,200 exchange fees.
- After the implementation of the fee reductions and in combination with the Multilateral Trade Registration, exchange fees of only EUR 200 apply for the entire order of 15,000 contracts – EUR 0.013 per contract.

The trade is successfully entered into the Eurex Clearing system once all counterparties have approved their partial trade. There is no risk that parts of the trade were already closed while remaining parts cannot be accomplished at the conditions intended.

New Multilateral Trade Registration Window

For further information, please refer to the Eurex Clearing website at **www.eurexclearing.com > Services > Wholesale Trading > Multilateral Trade Registration Facility** or contact Laurent Ortiz, T +33-1-55 27-67 72, e-mail: Laurent.Ortiz@eurexchange.com.

Eurex Enjoys Growing Interest from Dubai

Eurex currently sees growing demand for trading its international benchmark products from Dubai, having admitted another two local trading firms at the end of May. Further participants are in the admission process.

The first Dubai-based broker admitted to trading at Eurex was Orion Brokers DMCC, a subsidiary of Orion Holding Overseas S.A. Through Orion WebTrader, its fully computerized online trading platform, Orion Brokers provides local investors in the Middle East and North Africa with direct access to the Eurex product range.

Dubai Professional Trading Group DMCC is the first trading arcade which is connected to the Eurex network from Dubai, offering professional proprietary traders a tax-optimized – and hence cost-effective – infrastructure for Eurex trading in Dubai.

Together with Jebel Tariq Trading DMCC (already connected back in June 2007), there are currently three Eurex participants trading directly from the United Arab Emirates (UAE). Back in November 2006, Eurex obtained regulatory approval from the Emirates Securities & Commodities Authority (ESCA) for its products, followed by approval of the Dubai Financial Services Authority (DFSA) at the end of March 2007. The Access Point in Dubai has been in operation since the beginning of May 2007.

Orion Brokers DMCC is an organization authorized by the DFSA, a broker and clearing member of the Dubai Gold & Commodities Exchange (DGCX), as well as an off-floor member of the Dubai Mercantile Exchange Limited (DME). It is regulated and supervised by both the ESCA and DFSA.

Dubai PTG Dubai PTG, a joint venture company with the Dubai Government, is the first trading arcade in the Middle East catering for the needs of professional traders wishing to profit from a city that offers tax exemption and an unparalleled lifestyle.

ISE Announces Election of Three New Board Members

International Securities Exchange (ISE) announced on June 5, 2008, that three new members have been elected to its Board of Directors: Thomas Eichelmann, Chief Financial Officer of Deutsche Börse Group, will join the ISE Board as a non-industry director, Matthew Andresen and Timothy Brennan will join the Board as representatives of ISE's Primary Market Makers (PMMs) and Competitive Market Makers (CMMs), respectively.

Gary Katz, ISE's President and Chief Executive Officer, was truly pleased to welcome the new members to the Board of Directors; the three proven industry leaders will add valuable insight contributing their diverse knowledge.

Mr. Eichelmann joined Deutsche Börse AG on July 1, 2007 as Chief Financial Officer. From 2000 to 2007, the business economist was a Partner and Head of the Global Competence Center Financial Services at Roland Berger Strategy Consultants and was appointed a member of the Global Management Board in December 2002.

The economist and political scientist Mr. Andresen has been Co-Head of Citadel Derivatives Group and President of Citadel Execution Services since June 2004. Prior to Citadel, he was the Chief Executive Officer of Island ECN, and then Chief Operating Officer of Instinet, LLC following the merger of the two ECNs. Mr. Andresen serves on the Board of Directors of Direct Edge ECN.

Mr. Brennan is a Managing Director with Merrill Lynch responsible for listed options Automated Market Making business development. Prior to joining Merrill Lynch in November 2007, Mr. Brennan was a Senior Vice President for Automated Trading Desk where he was responsible for building an Automated Market Making business.

In addition to the newly elected Board members, Dr. Frank Jones, Sarah Miller and Andreas Preuss were re-elected to serve a two-year term. Gary Katz, ISE's President and Chief Executive Officer,

was re-elected to serve a one-year term. Peter Bottini, Executive Vice President of Trading/Customer Service at optionsXpress, Inc., was also re-elected for a two-year term as a representative of ISE's Electronic Access Members (EAMs).

Status as of June 30, 2008

Eurex Trading Volume Reaches 198 Million Contracts

- **Second-best month in 2008**
- **Average daily trading volume of 9.4 million contracts**

The international derivatives exchange Eurex reported today that in June 2008 trading volume reached 197.7 million contracts, compared with 196.3 million in June 2007 and 194.6 in May 2008. Thus, June 2008 is one of the three strongest months ever on Eurex. Average daily trading volume at Eurex was 9.4 million contracts in June; for the first six months of 2008 the figure is 9.1 million. Through the end of June, total trading volumes on Eurex reached 1,146 million contracts, up 18 percent year-on-year (Jan–Jun 2007: 970.6 million).

The strongest segment, equity index derivatives, counted 86.1 million contracts, up 14 percent year-on-year (June 2007: 75.6 million). The most heavily traded product on Eurex, the future on the Dow Jones EURO STOXX 50® Index, grew slightly to 38 million contracts (June 2007: 35.7 million). Options on the Dow Jones EURO STOXX 50® Index reached its third-best month and totaled 31 million contracts (June 2007: 19.4 million). Equity derivatives volumes climbed by more than 50 percent to 46.4 million contracts (June 2007: 30.6 million), with 30.6 million contracts in equity options and 15.8 million contracts in Single Stock Futures.

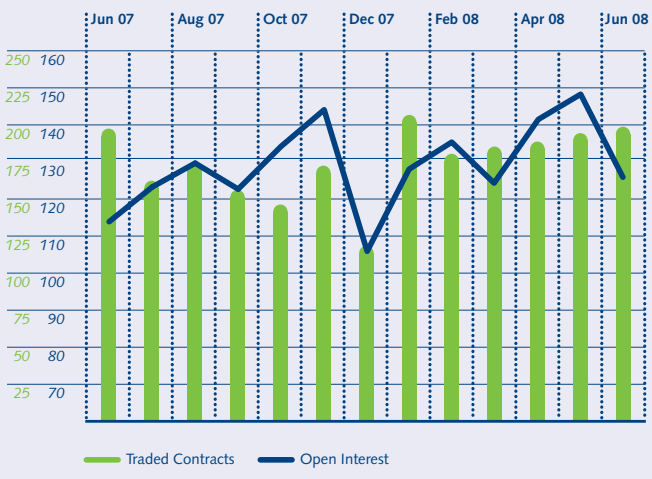

The interest rate derivatives segment reached 65.1 million contracts compared with 90.1 million in June 2007. The Euro-Bund Future totalled 25.1 million contracts, the Euro-Bobl Future 14.7 million contracts and the Euro-Schatz Future roughly 19.4 million contracts.

At the International Securities Exchange (ISE), which has been a subsidiary of Eurex since the end of December 2007, U.S. options reached an average daily trading volume of 3.9 million contracts (June 2007: 3 million, up 30 percent). In total, trading volume increased by 30 percent to 81.4 million options contracts (June 2007: 62.6 million).

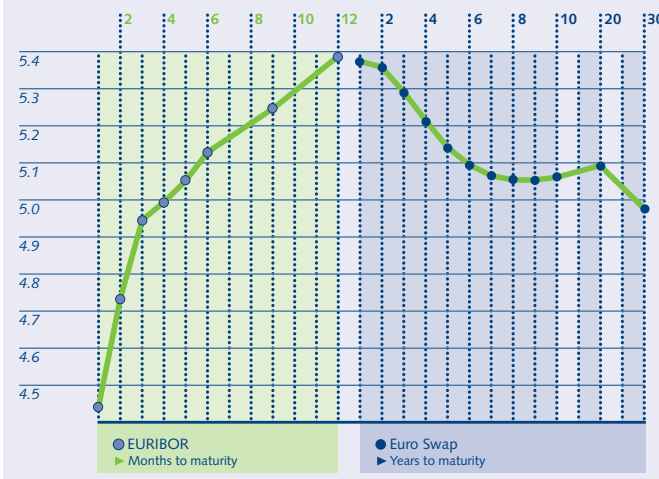

Eurex Repo, which operates CHF and EUR repo markets, set new records in all segments in June 2008: all Eurex repo markets had a new peak, average outstanding volume was EUR 134.3 billion (June 2007: EUR 93.9 billion). The secured money market segment, Euro GC Pooling®, set strongest growth and rose by 260 percent to an average outstanding volume of EUR 39.9 billion (June 2007: EUR 11.1 billion).

The electronic trading platform Eurex Bonds, which rounds out Eurex's interest rate derivatives segment, traded volume of EUR 8.7 billion (single counting) in June compared to the May 2008 figure of EUR 7.1 billion (+ 23 percent); in June 2007 volume was EUR 17 billion.
