May 2007

Seven New Options on German Mid Caps

With effect from May 21, 2007 Eurex participants will be able to trade seven further German options on MDAX® and TecDAX® equities. In addition to the options on the 30 DAX® stocks, market participants will thus be able to trade 17 German segment options on MDAX® equities and eight on TecDAX® equities. All in all, Eurex options cover over 50 percent of the freely tradable market capitalization of the MDAX® and the TecDAX®.

The new derivatives include options on Conergy, GEA Group, K+S, Premiere, Q-Cells, Stada Arzneimittel and United Internet. As of June 1, the new options will be included in the German Advanced Market-Making package and in Permanent Market-Making. This gives Market Makers an incentive to quote these options on a permanent basis.

The contract specifications are based on the existing German equity options. Each contract comprises 100 shares, and has a maximum maturity of 24 months.

Options on	Underlying ISIN and Product ISIN	Country Code	Product ID	Contract Size	Minimum Price Change
Conergy	DE0006040025	DE	CGY	100	0.01
GEA Group	DE0006602006	DE	G1A	100	0.01
K+S	DE0007162000	DE	SDF	100	0.01
Premiere	DE000PREM111	DE	PRE	100	0.01
Q-Cells	DE0005558662	DE	QCE	100	0.01
Stada Arzneimittel	DE0007251803	DE	SAZ	100	0.01
United Internet	DE0005089031	DE	UTDI	100	0.01

By introducing the equity options, Eurex is continuing to focus on the increasing demand among participants for derivatives on attractive mid caps from the MDAX® and TecDAX® segment. The increase in demand is fuelled in particular by ETF issuers, hedge funds, traditional investment funds and issuers of warrants and certificates on German small caps. Furthermore, the options on the GEA Group, K+S, Q-Cells and Stada Arzneimittel complement the Single Stock Futures that are already available on these stocks.

940,000 German Equity Option Contracts Traded per Day on Eurex

The German segment was also the strongest equity option segment in 2006, with over 180 million contracts traded. This represents eleven percent growth year-on-year. This growth has continued in 2007, with a total of 78 million contracts traded in the first four months of the year, and a year-on-year increase of 30 percent. An average of 940,000 contracts are currently traded every day in the German segment.

German Equity Options: Daily Trading Volume and Open Interest (in Thousands)

Detailed contract specifications for all equity options can be found at **www.eurexchange.com > Trading > Products > Equity Derivatives > Equity Options**; further information is available from Dr. Michael Durica, T +49-69-211-1 59 23, e-mail: Michael.Durica@eurexchange.com.

RDXxt®– A Widely Diversified Index That Meets International Criteria

The RDXxt® Extended Index provides investors with access to the Russian equity market, enabling them to participate in the Russian economic upturn. Those investors who have invested in Russia in recent years now have particular reason to be pleased, as the Russian equity market has recorded considerable price gains: the RDXxt® Extended Index has climbed by approximately 260 percent since 2002. This upward trend is set to continue in 2007.

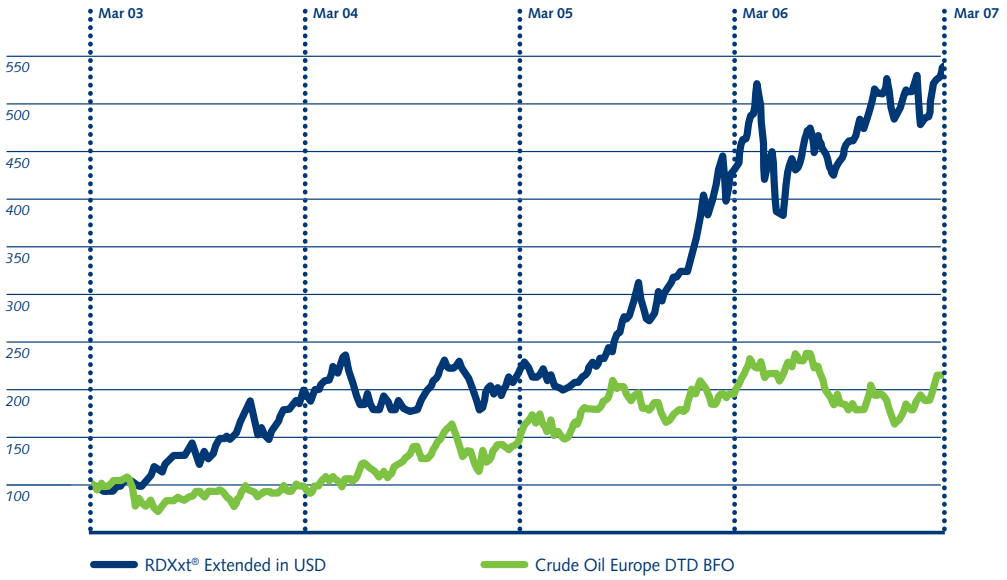

The Vienna Stock Exchange's new RDXxt® Extended Index offers investors broader market exposure compared to the RDX® Index, and hence, a higher degree of diversification. RDXxt® consists of a minimum of 15 of the London Stock Exchange's best-performing depository receipts on Russian stock market blue chips. The maximum weighting of an RDXxt® company is ten percent. The composition of the RDXxt® is available in detail online at **www.indices.cc**.

RDXxt® complies with CFTC and UCITS requirements and can therefore be used worldwide as a basis for standardized derivatives and structured products.

Positive Development for Russian Economy

Russia is one of the four BRIC countries (Brazil, Russia, India, China), all of which show huge growth potential. The Russian economy is in better shape than ever before. The IMF (**I**nternational **M**onetary **F**und) expects 6.5 percent growth in GDP and inflation of 8.5 percent in 2007.

RDXxt®: March 2003 – March 2007

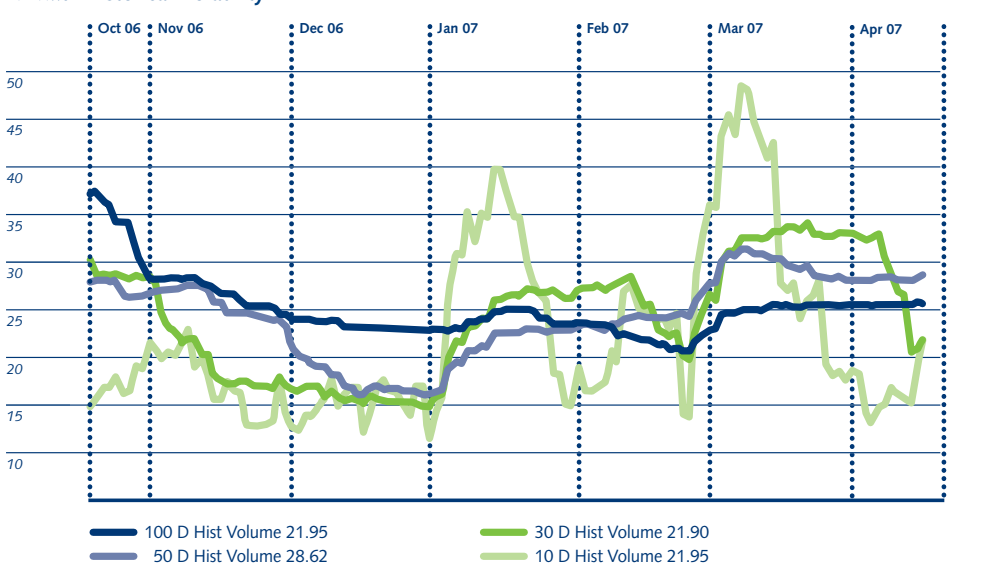

Source: Bloomberg

Russia possesses considerable natural resources such as oil and gas. The country even managed to generate a budget surplus in 2006 on the back of increasing revenue from the energy sector. The economy is also supported by other factors, such as above-average growth in income and consumer spending, as well as strong development in the services sector. The ruble has been freely convertible since July 2006.

RDXxt® Futures and RDXxt®-based Certificates

The economic upturn in Russia is having an extremely positive effect on the Russian equity market.

RDXxt® Historical Volatility

Source: Bloomberg

So far, investors have been able to use certificates to participate in this upturn. Now, they have new opportunities for investment in Russia over and above the existing RDXxt®-based certificates issued by Erste Bank, Goldman Sachs and HVB: Eurex has been offering standardized futures on the RDXxt® and all constituents of this index as well as options on individual depository receipts since April 23, 2007.

Further information is available at **www.indices.cc** or directly from the author of this article: Florin Burnar, T +43-1-531 65-169, e-mail: florin.burnar@wienerborse.at.

Eurex Launches Russian Derivatives

With derivatives on Russian underlying instruments, launched on April 23, Eurex now offers the opportunity for trading and hedging in one of the most attractive emerging markets.

The new products are traded in US dollars – another "first" for Eurex. To support the launch, Eurex announced a fee holiday waiving all trading, clearing and settlement fees in these products until the end of July 2007.

Single Stock Futures on all Constituents of the RDX Extended Index
Besides a futures contract on the RDXxt® USD index calculated by Wiener Börse AG (the Vienna Stock Exchange), Eurex offers Single Stock Futures on all 15 constituents of this index, and on X5 Retail Group DRs. Depending on the underlying instrument, Single Stock Futures have a contract size of 50, 100 or 500 shares. Flexible portfolio management is facilitated through 14 contract months, with a maximum maturity of three years: the next twelve calendar months plus the two following yearly contract months of the December cycle.

Eurex market participants currently have a choice of more than 400 Single Stock Futures, including all constituents of the German blue chip index DAX®, the Dow Jones EURO STOXX 50® Index and the Swiss SMI®.

Options on the Major Russian DRs
Eurex also offers options on four DRs listed at the London Stock Exchange: Gazprom, Lukoil, Norilsk Nickel, and Surgutneftegaz. These options contracts have a size of 50 or 100 shares, and lifetimes of up to twelve months. Trading, clearing and physical delivery of the new options are in line with internationally-accepted standards. These option are European-style options, which can only be exercised on the last trading day.

For detailed information on Eurex's range of Russian derivatives, please refer to the Eurex website **www.eurexchange.com > Trading > Products > Equity Derivatives or Equity Index Derivatives**. For any further information, please feel free to contact Christine Heyde on T +49-69-211-1 56 98, e-Mail: Christine.Heyde@eurexchange.com, or Tobias Ehinger on T +41-58-854-23 08, e-mail: Tobias.Ehinger@eurexchange.com.

Treatment of Corporate Actions for Russian Derivatives

When holding shares of Russian companies, certain special characteristics need to be considered regarding the notification of corporate actions. Eurex has developed special regulations governing the treatment of corporate actions for Russian derivatives, to account for these characteristics and to harmonize them – to the extent possible – with procedures applied at other European exchanges.

The general principle that no adjustment to option series or Single Stock Futures is made in the event of ordinary dividends also applies to contracts based on Russian underlying instruments. What is new is the concept of an extraordinary dividend, defined – in the context of Russian derivatives – as the portion of a dividend distribution exceeding five percent of the volume-weighted average of all prices traded on the exchange trading day preceding the ex-dividend day.

Additional regulations introduced refer to measures taken where corporate actions are announced after the record date for the distribution, or without stipulating a distribution amount.

- Where a distribution is only announced after the relevant record date, trading in affected contracts will be suspended immediately. The relevant futures contracts and options series will be adjusted with effect from the next exchange trading day.
- If a distribution is announced without a stipulated amount, and the amount is not expected to be specified prior to the record date, trading in affected contracts will be suspended on the ex-dividend day. The relevant futures contracts and options series will be adjusted effective from the exchange trading day following the ex-dividend day. This adjustment will be based on the difference between the volume weighted average price of the underlying instrument on the exchange trading day preceding the ex-dividend day, and the average on the ex-dividend day.
- If a distribution is announced without a stipulated amount and the announcement takes place after the record date, trading in affected contracts will be suspended immediately. In this case, the relevant futures contracts and options series will be adjusted effective from the exchange trading day following the announcement. This adjustment will be based on the difference between the volume weighted average price of the underlying instrument on the exchange trading day preceding the announcement day, and the average on the announcement day.

For any further information, please feel free to contact Tobias Ehinger on T +41-58-854-23 08, e-mail: Tobias.Ehinger@eurexchange.com.

Two Additional Futures Contracts on U.K. Stocks

Eurex will launch two additional futures contracts on U.K. underlyings on May 21, in addition to the 17 U.K. Single Stock Futures already announced.

The two additional contracts will be based on stocks in Lonmin and Man Group. Eurex has announced a six-month fee holiday, waiving all transaction fees for all 19 Single Stock Futures on U.K. stocks. The contracts will be quoted in pence, with a minimum price change of 0.01 pence, and settled in pound sterling. Contract specifications are otherwise in line with those of existing Single Stock Futures.

For detailed contract specifications of all Single Stock Futures, please refer to the Eurex website **www.eurexchange.com > Trading > Products > Equity Derivatives > Single Stock Futures**. For any further information, please feel free to contact Dr. Weiwei Wang on T +49-69-211-1 72 62, e-mail: Weiwei.Wang@eurexchange.com.

Reduction in Minimum Price Change for Euro-Bobl Futures and Options on Euro-Bobl Futures

Eurex will reduce the minimum price change (tick size) for Euro-Bobl Futures and Options on Euro-Bobl Futures, effective June 8, 2007. This will reduce the costs incurred by market participants for hedging, or rolling over positions, by approximately 50 percent. Halving the tick size for Euro-Schatz Futures three years ago resulted in an improvement to the market structure, and hence to rising volumes. The two-year Euro-Schatz Future is accepted as the benchmark in its maturity segment, and the most actively traded short-term bond futures contract worldwide.

With the introduction of "half-tick" pricing, the tick size for Euro-Bobl Futures and Options on Euro-Bobl Futures will be reduced from 0.01 to 0.005 percent, and tick value from EUR 10 to EUR 5. The change in tick size will take place on June 7, after close of trading (22:00 CET). All unexecuted Euro-Bobl Futures orders in the Eurex® system will be deleted that evening, and will have to be re-entered (if required) in the morning on June 8.

Hedging Costs to be Halved

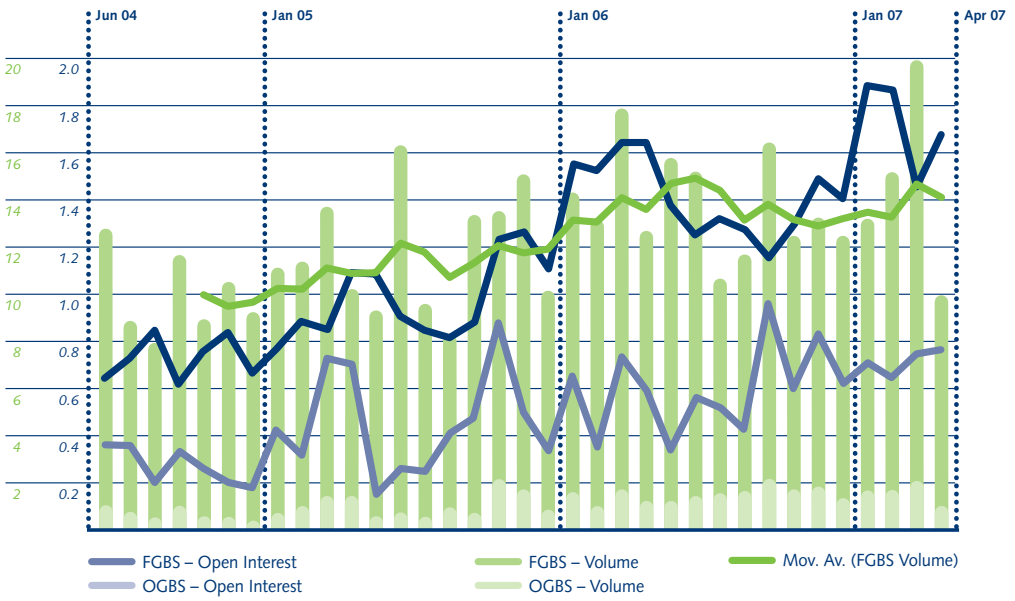

The narrower bid/ask spread – as a result of the reduced tick size – holds advantages for traders and institutional clients alike, when establishing or hedging positions. The bid/offer spread is the largest component of implied transaction costs. Reducing the tick size will halve the implied transaction costs incurred in a rollover trade. At the same time, hedgers will be able to cover their risk exposure more efficiently. For instance, when trading 1,000 Euro-Bobl Futures, implied transaction costs amount to 0.53 basis points (bp), of which 0.46bp is attributable to the bid/offer spread and 0.07bp to adverse price movements (reflecting market depth). Assuming unchanged liquidity, halving the bid/offer spread will reduce trading costs by 0.23bp for a nominal amount of EUR 100 million.

Soaring Euro-Schatz Futures Volumes After Tick Size was Halved

Eurex had halved the tick size of Euro-Schatz Futures exactly three years ago – a move that significantly enhanced the product's attractiveness and liquidity: Nowadays, Euro-Schatz Futures are the second most actively traded interest rate derivatives product at Eurex, only beaten by Euro-Bund Futures. Taking Eurex's full derivatives product range into account, the Euro-Schatz Futures rank fourth, following Euro-Bund Futures and Dow Jones EURO STOXX 50® Index Options and Futures.

Eurex traded 58 million Euro-Schatz Futures contracts during the first four months of 2007 – an increase of 31 percent over the first four months of 2004. The daily average volume currently stands at 700,000 contracts.

Euro-Schatz Futures and Options on Euro-Schatz Futures: Volume and Open Interest (in Million Contracts)

Decision to Reduce Minimum Price Change for Calendar Spreads Reversed

Concurrently with the announcement to halve the tick size for Euro-Bobl Futures and Options on Euro-Bobl Futures, Eurex has reversed its previous decision to reduce the tick size for calendar spreads for Euro-Bund and Euro-Bobl Futures with effect from May 21. Following in-depth analysis, numerous exchange participants had voiced concerns regarding the handling of synthetic orders for the execution of trades at reduced tick sizes in the individual order books. However, synthetic orders at reduced tick sizes are inevitable where spread and single-leg orders with different tick sizes are integrated in a single order book.

Status as of April 30, 2007

April Trading Volumes on Eurex Grew by 24 Percent Year-on-Year to 151 Million Contracts

- **New monthly record of equity derivatives with 53 million contracts**
- **Best April figure of index derivatives with 49 million contracts**
- **Average daily trading volume at eight million contracts**

Eurex, the international derivatives exchange, traded a total of 151 million contracts in April, an increase of 24 percent year-on-year (April 2006: 122 million contracts). Average daily trading volume at Eurex was roughly eight million contracts. Total trading volumes in 2007 reached 618 million contracts in the first four months (plus 24 percent year-on-year).

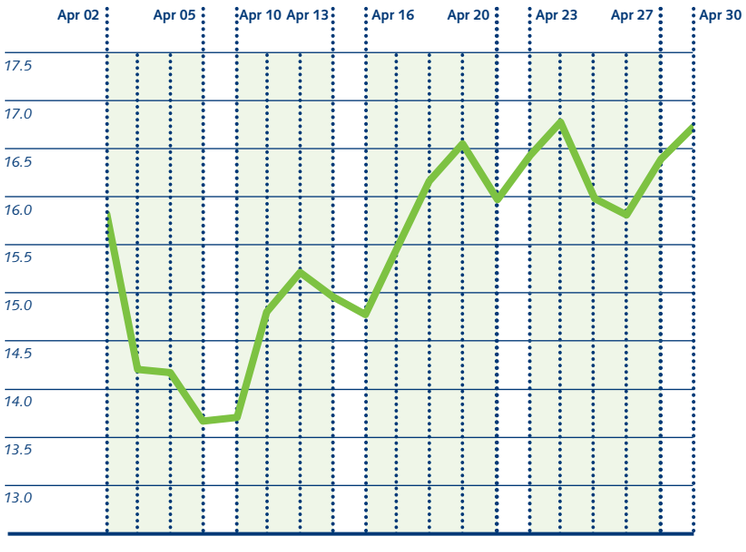

In April, equity derivatives set a new record with a total of 53 million contracts, an increase of approximately 50 percent year-on-year (April 2006: 35.6 million contracts). Of the equity derivatives, particularly strong growth was seen in Single Stock Futures. In April, trading volumes doubled to a total of eleven million contracts compared with the previous month. In the segment equity options, the Allianz option set a new monthly record with 6.7 million contracts.

Equity index derivatives were up by 77 percent year-on-year, totaling 49 million contracts. Of these, the largest single product are the futures and options on the Dow Jones EURO STOXX 50® Index with 18.5 million futures and 17.6 million options traded.

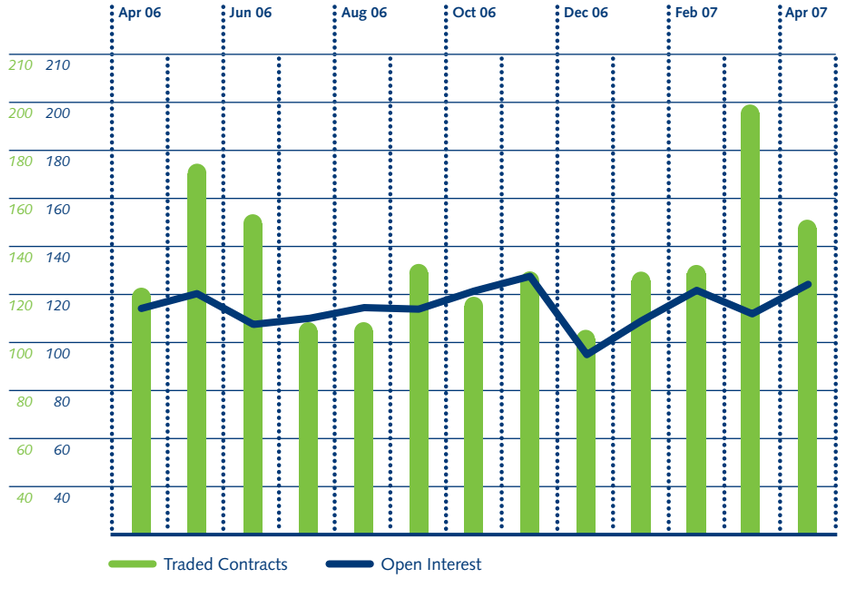

Approximately 49 million contracts were traded in the interest rate derivatives segment (April 2006: 59 million contracts). The Euro-Bund Future remained the most successful product at Eurex with 23 million contracts.

Approximately EUR 9.2 billion (single counting) was traded in April on the electronic trading platform Eurex Bonds (April 2006: EUR 10 billion), which rounds out Eurex's interest rate product range.
