Key Figures Jul, Aug (insert)

On July 27, 2007, shareholders of International Securities Exchange (ISE) voted to approve the merger agreement of ISE and Eurex which, upon completion, will create the leading transatlantic derivatives marketplace.

At a special shareholders meeting in New York, 99.7 percent of the stockholders who voted were in favor of the agreement. More than 67 percent of eligible shares were voted. Under the terms of the agreement, Eurex will pay ISE shareholders USD 67.50 in cash for each ISE share held. The combination will be implemented by way of a merger between ISE and a subsidiary of U.S. Exchange Holdings Inc., itself a Eurex subsidiary.

Eurex CEO Andreas Preuß said: "The result of the extraordinary general meeting marks an important step towards the anticipated creation of the leading transatlantic derivatives marketplace. We are confident that this partnership will significantly strengthen our global position in the derivatives markets. It will enable ISE and Eurex to offer trading efficiencies and access to a global product suite to our respective exchange members. After the transaction closes, we plan to integrate the two businesses as promptly as possible to deliver additional value to our shareholders and customers."

The affirmative shareholder vote on July 27, and the antitrust clearance by the U.S. Department of Justice obtained already in May satisfy two conditions to the closing of the transaction. The merger still requires approval by the U.S. Securities and Exchange Commission. Eurex and ISE expect to close the transaction in the forth quarter of 2007 as anticipated at the time of the announcement on April 30, 2007.

The combination of Eurex and ISE will create the leading transatlantic derivatives marketplace with a combined overall trading volume of 2.1 billion contracts in 2006. The combination will have a broad USD- and EUR-denominated product coverage as well as significant operations and revenues in both the U.S. and Europe. It will further strengthen Eurex's position as market leader in equity, equity index and long-term interest rate derivatives worldwide. Eurex's and ISE's complementary member bases and product portfolios provide significant growth opportunities across asset classes and national boundaries. Further upside potential stems from joint product and business development opportunities.

Eurex to Launch Trading in Austrian Equity Options

Eurex has expanded its offering in the European equity options segment, starting with options on eleven Austrian issues on September 10. Market participants are thus able to trade equity options on a total of 294 stocks from eleven different countries.

In detail, the new Austrian equity options refer to the shares of Boehler-Uddeholm, bwin Interactive Entertainment, Erste Bank, IMMOEAST, OMV, Raiffeisen International, RHI, Telekom Austria, Verbundgesellschaft, Voestalpine and Wienerberger. With the exception of IMMOEAST, all of the underlying shares are included in the Austrian blue chip index ATX. The new options add to the ten Single Stock Futures on selected Austrian shares, which have been available for trading since 2006.

With the introduction of Austrian equity options, Eurex takes another step towards the coverage of major European markets. Demand for the new options is expected to come from fund managers and proprietary traders, as well as from issuers of warrants and certificates.

The contract specifications are in line with those of existing German equity options: The new options each have a contract size of 100 shares and are available with lifetimes of up to 24 months. Through November 2007, Eurex will waive all fees incurred for trading the new products, while a Market-Making scheme for Austrian equity options will help boost liquidity from the very beginning. Finally, market participants will also be able to settle transactions executed off-exchange using the OTC functionalities offered by Eurex Clearing AG.

For detailed contract specifications, please refer to the Eurex website at **www.eurexchange.com > Trading > Products > Equity Derivatives**, or contact Dr. Michael Durica on T +49-69-211-1 59 23, e-mail: Michael.Durica@eurexchange.com.

Futures on Dow Jones STOXX® 600 and Dow Jones STOXX® Mid 200 Indexes Approved for U.S. Market

On July 18, 2007, the Commodity Futures Trading Commission (CFTC) has approved trading in further Eurex products on the U.S. market with immediate effect. The approval comprises the futures contracts on the European Dow Jones STOXX® 600 and Dow Jones STOXX® Mid 200 Indexes. The U.S. market is one of Eurex's most important markets and the approval of further products will provide U.S. participants with new trading and diversification opportunities.

Over the last years, the Dow Jones STOXX® 600 Index has firmly established itself as a benchmark for European equities, and as an equivalent to the S&P 500 Index. The increasing trading volume of derivatives on the Dow Jones STOXX® Mid 200 Index is a clear indicator for the large interest of European investors to trade a pan-European mid cap index.

U.S. participants can already trade in Eurex's benchmark products, including futures on the Dow Jones EURO STOXX 50® Index and the benchmark index DAX®, as well as the Euro-Schatz, Euro-Bobl and Euro-Bund fixed income derivatives. The trading volume generated directly from the U.S., in CFTC-approved products, currently amounts to around 15 percent of the respective volume traded at Eurex.

Eurex has been able to offer selected products on the U.S. market since 1999. The CFTC's "no-action letter" dated August 1999 allows Eurex to admit U.S. participants and defines the range of products that can be traded in the U.S. At present, 67 companies with more than 1,350 authorized traders from the U.S. are connected to the Eurex network.

Euro GC Pooling®: Extension of Securities Pool

Eurex Repo has internationalized its Euro GC Pooling® offering on September 3, 2007 when it widened the securities eligible for its delivery basket and linked the collateral pools of Clearstream Banking Frankfurt and Clearstream Banking Luxembourg. At a stroke, Eurex Repo Euro GC Pooling® users were able to trade over 8,000 highly-rated German fixed income instruments, as well as Eurobonds and other non-German European bonds.

The new connection between Clearstream Frankfurt and Clearstream Luxembourg effectively creates a virtual pool of securities, allowing all Clearstream Banking clients who are also members of Eurex Repo and Eurex Clearing as well as users of Xemac® or CmaX, Clearstream's collateral management systems, to make full and effective use of Euro GC Pooling®.

GC Repo Trading Further Simplified

The repo market is fast evolving from a securities financing business, dominated by special repo, to a cash-driven market where broader general collateral (GC) management is more important; efficiency across the entire deal chain is becoming of increasing importance. Euro GC Pooling® has already radically simplified GC repo trading, delivering seamless trading, clearing and settlement. The latest enhancements will take it to a new level.

Average Annual Growth Rate of 48 Percent

Euro GC Pooling® is now used by 20 active trading institutions and several other international banks have expressed an interest to join. The average annual growth rate has totalled 48 percent since it was launched in March 2005. The trading activities peaked EUR 17 billion of daily outstanding volume.

Euro GC Pooling® simplifies the process of transacting extremely large tickets. Deals can be seamlessly completed and then automatically processed without any issues over credit through the CCP, automatic security selection and allocation allows trades as large as EUR 10 billion to take place through the system.

Euro GC Pooling® was developed jointly by Eurex Repo, Eurex Clearing and Clearstream Banking with the express purpose of delivering all the recognizable advantages of electronic trading on a robust platform, through a well-regarded Clearing House in combination with a centralised collateral management system. It provides an easy exchange between cash and securities and also facilitates participation in the European Central Bank's weekly tenders. Euro GC Pooling® delivers a truly seamless, front-to-back trading solution for repo market participants.

For any further information, please feel free to contact Gabriele Ristau on T +49-69-211-1 57 41, e-mail: eurex.sales@eurexchange.com or Pascal Morosini on T +352-243-3 68 68, e-mail: gsf@clearstream.com

New Direct Hit Functionality Speeds Up Trading in the CHF Repo Market

With effect from July 16, 2007, Eurex Repo has enhanced its trading model in the bilateral CHF repo market by adding a set of Direct Hit functions. The transaction process is thus reduced from three to a mere two steps, with the entire trading workflow being streamlined. This will also shorten response times in the event of major market moves.

The new functionality allows for faster transactions in the Intraday, OverNight and TomNext maturity windows. All it takes to enter into a repo transaction is a single click, followed by a confirmation. Unlike in the past, however, confirmation from the part of the quoting bank is waived, with the relevant transaction being immediately passed on to SegaInterSettle AG (SIS) or Swiss Interbank Clearing (SIC) for settlement.

The Direct Hit functionality does not only speed up CHF repo trading, but also results in the activation of new, mutual business relationships. This lends additional growth drivers to the market, while facilitating trading in higher amounts. Speed in trading and the settlement of CHF repo transactions on a same-day basis are both unique on an international scale.

At the end of August 2007, outstanding volumes in the CHF repo market stood at CHF 82 billion. Several weeks after the launch of the Direct Hit feature, up to 50 percent of all transactions in short-term maturities have already been settled using the new functionality.

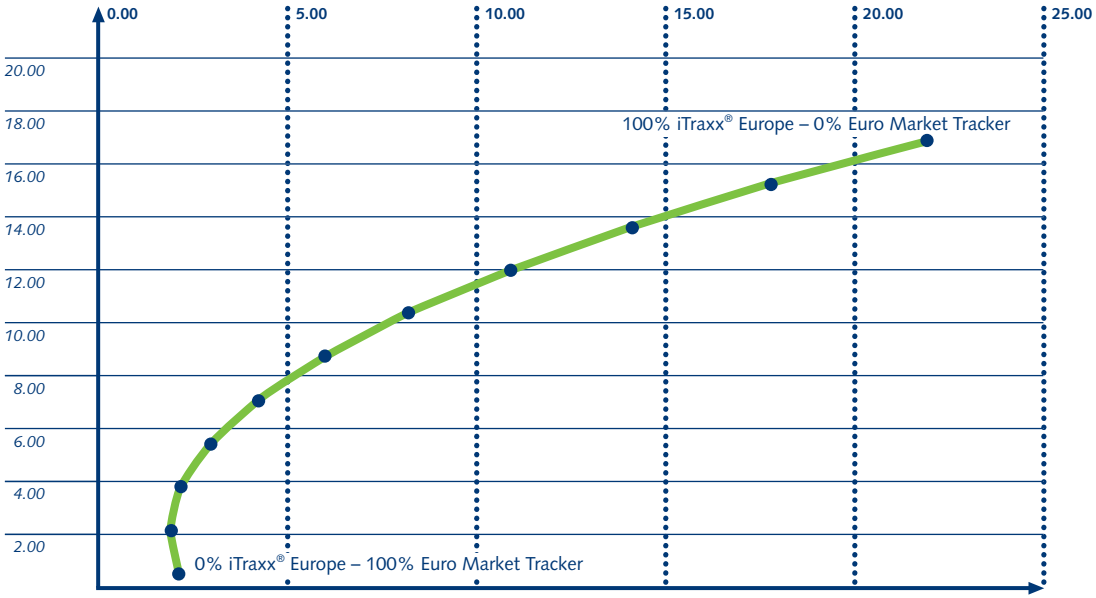

For more information, please refer to the Eurex Repo website at **www.eurexrepo.com > CHF Market**, or contact Flavio Morganti on T +41-58-854-24 62, e-mail: Flavio.Morganti@eurexchange.com.

Case Study: Portfolio Overlay Strategy Using Eurex iTraxx® Credit Futures – Introducing More Options in European Fund Management

Eurex's recent launch of the iTraxx® Europe, Crossover and HiVol Index Futures has expanded the exchange's range of products to the credit markets. Combined with Eurex's existing benchmark fixed income futures contracts the new iTraxx® Credit Futures contracts introduce greater opportunities in European fixed income fund management. Byron Baldwin, a member of the Eurex Institutional Investor Sales Team, outlines in the following article how the efficiency of fund management can be increased by using Eurex iTraxx® Credit Futures in portfolio overlay.

The benefit of introducing credit as an asset class within fixed income fund management is underlined in a recent paper by Brian Eales[1]. Using data from the September to December 2006 period, Eales looked at the benefits of incorporating credit into a European government bond portfolio. In his study, credit exposure was introduced through the iTraxx® Europe CDS Index, while the Bloomberg/EFFAS Euro Market 3-5 Year Bond Index was considered as the proxy for a short-term maturity European government bond holding.

Efficient Frontier: Euro Market Tracker Bloomberg/EFFAS Euro Market 3-5 Year Bond Index

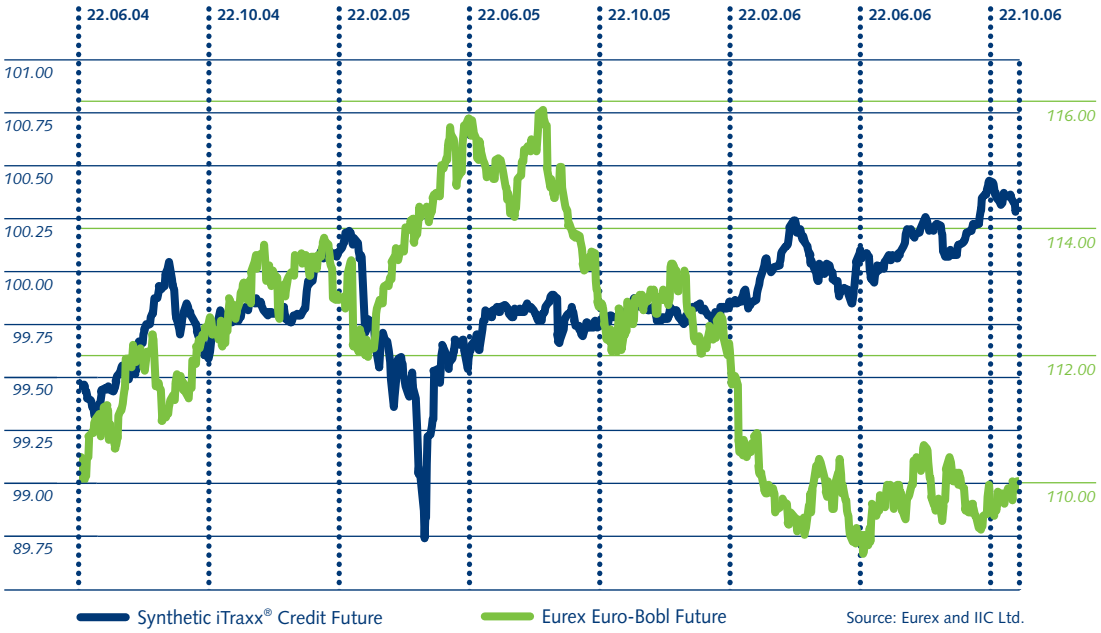

Source: B. Eales: "The Case for Exchange-based Credit Futures Contracts". Data Origin: Bloomberg LP and IIC Ltd.

The analysis demonstrated that the inclusion of credit into a bond portfolio reduced risk and increased return. The results showed that a ten percent inclusion of iTraxx® reduced risk by 0.19 percent and increased return by 1.63 percent, while a 20 percent holding increased risk by only 0.10 percent but increased return by 3.27 percent. The attraction of augmenting credit within fixed income portfolio management is underlined by the diagram below which looks at the history of a synthetic iTraxx® Credit Future and the Eurex Euro-Bobl Future[2].

[1] B. Eales, London Metropolitan University, "The Case for Exchange-based Credit Futures Contracts".
[2] There has also been a study on the relationship between iTraxx® CDS Index and equity prices: H. Byström, Lund University, "Credit Default Swaps and Equity Prices: The iTraxx CDS Index Market".

Synthetic iTraxx® Credit Future and Eurex Euro-Bobl Future

Consider the situation of a European fixed income fund manager who manages a EUR 500 million short maturity European government bond portfolio that has a modified duration of 4.5 years. The fund manager decides to switch 20 percent of the European bond exposure to a European credit exposure using the Eurex Euro-Bobl Futures and iTraxx® Europe Credit Futures contracts.

Steps:

1. Calculate Portfolio Basis Point Value (BPV is the price value of an 0.01 change in yield):

Portfolio BPV = Portfolio Modified Duration × Portfolio Value × 0.0001
= 4.5 × EUR 500 million × 0.0001
= EUR 225,000

2. Calculate the BPV of the Eurex Euro-Bobl Futures contract using the Bloomberg DLV and DUR function:

BPV of the Eurex Euro-Bobl Futures = BPV_{CTD} / CF_{CTD}
BPV_{CTD} = BPV of the cheapest-to-deliver bond (CTD)
CF_{CTD} = conversion factor of the cheapest-to-deliver bond

Alternatively, the BPV of a futures contract can be generated very quickly using the Bloomberg FRSK function. For the September 2007 Euro-Bobl Futures contract that is OEU7 <cmdty> FRSK <go> which gives 0.04807 in price terms, 9.614 futures ticks or EUR 48.07 in monetary terms.

3. Calculate the appropriate number of Eurex Euro-Bobl Futures to sell to synthetically reduce the fund managers' European government bond exposure by 20 percent:

Number of Euro-Bobl Futures to sell = (EUR 225,000 / EUR 48.07) × 0.20 = 936

4. Calculate the Eurex Euro-Bobl Futures/Eurex iTraxx® Europe Credit Futures ratio:

The BPV of the Euro-Bobl Futures is EUR 48.07 (see second step). The price value of a basis point change in the CDS curve in terms of the iTraxx® Europe Credit Future is EUR 45.25, which can be generated using the Bloomberg FCDS[3] screen. Type FEAA <index> FCDS <go> and go to SprdDV01 (there is a small interest rate exposure being long credit futures, but the exposure is minimal, see IR DV01).

Therefore, the ratio is: 1 Eurex Euro-Bobl Futures contract / 1.06 Eurex iTraxx® Credit Futures.

The fund manager sells 936 Eurex Euro-Bobl Futures and buys 992 Eurex iTraxx® Europe Credit Futures to synthetically switch 20 percent of his European bond exposure to a European Credit exposure. By way of this portfolio overlay strategy, the fund manager can quickly switch part of his European bond exposure to a European credit exposure, whilst leaving his existing portfolio intact[4]. When the fund manager feels the out-performance of credit has run its course, he can unwind the short Euro-Bobl/long iTraxx® Europe Credit Futures spread position. The diagram below outlines portfolio overlay using Eurex Euro-Bobl and iTraxx® Credit Futures contracts.

Using iTraxx® Credit Futures in Portfolio Overlay

The Eurex OTC Block Trade Facility (BTF) is extended to iTraxx® Credit Futures and promotes maximum liquidity and trading flexibility for a fund manager initiating portfolio overlay strategies across European credit and bonds. The BTF[5] allows market participants, trading either for their own account or on behalf of customers, to enter off-exchange transactions in Eurex futures and options contracts and yet still have the transactions cleared by Eurex Clearing AG, the Eurex Clearing House – see below:

Eurex OTC Block Trade Facility

Contract	OTC Block Trade – Minimum Amount of Contracts
iTraxx® Europe Index Futures	2,500
iTraxx® HiVol Index Futures	1,500
iTraxx® Crossover-Index Futures	1,000
Euro-Schatz Futures	4,000
Euro-Bobl Futures	3,000
Euro-Bund Futures	2,000
Euro-Buxl® Futures	500

[5] Detailed information on the Eurex OTC Block Trade Facility on **www.eurexchange.com > Trading > Market Model > Wholesale Trading > Block Trades**.

Conclusion

Using derivatives in portfolio overlay increases the efficiency of fund management by allowing fund managers to quickly move from one asset class to another without disrupting the underlying portfolio. The recent launch of the Eurex iTraxx® Credit Futures contracts introduces a new asset class for this strategy. The iTraxx® Credit Futures contracts offer fund managers a *highly-leveraged* (0.29 percent of underlying margin required for iTraxx® Europe Index Futures; 0.55 percent for iTraxx® HiVol Index Futures and 2.0 percent for iTraxx® Crossover Index Futures) and *cheap* (exchange fees of EUR 0.40 per EUR 100,000) access to credit market "beta".[6] [7]

Online Info Center About Eurex Release 10.0 Launched on Eurex Website

On September 10, 2007, Eurex has launched an online information center providing information about Eurex Release 10.0, which will go live on November 26, 2007. In addition to all relevant documentation regarding Eurex Release 10.0, the info center will also offer details regarding the functional changes and enhancements introduced with the new release.

Specifically, you will be able to get an overview of various new trading functions and related enhancements, such as new order handling features, the extended Wholesale OTC functionality, and our advanced pre-execution risk mitigation features. The new "persistent" and "non-persistent" order attributes will also be outlined in detail. You will be able to practice all new functions from September 16, 2007 onwards, when they will be available in our simulation environment. As a trader, being able to practice the distinction between "persistent" and "non-persistent" orders in a hands-on fashion, in the simulation environment, will help you to use this order attributes efficiently once the new release is rolled out. The info center also provides an overview of where to get support for Eurex Release 10.0, including the relevant hotline numbers.

Given the backward compatibility restrictions of Eurex Release 10.0, we also recommend to have your software vendors conduct a review of your in-house applications, to ensure that they are ready for the new system release in good time.

Furthermore, the Release 10 Info Center provides information on two new optional interfaces which Eurex will launch as part of its Technology Roadmap. Scheduled for introduction on December 3, 2007, the Enhanced Broadcast Solution will allow you to receive more un-netted market data in real time.

The Enhanced Transaction Solution is scheduled for the first half of 2008. It is geared to facilitate latency-minimized entry and management of trading-related systems entries.

You can access the information center on **www.eurexchange.com/r10**. For further information, please contact Oana Ardelean, T +49-69-211-1 80 09, e-mail: Oana.Ardelean@eurexchange.com or your local Eurex sales representative.

Strong Response to Eurex Webinars

Online seminars ("webinars") offered by Eurex within the scope of an educational partnership program are increasingly well received: An average of 200 visitors is registering for the various interactive online seminars featuring renowned exchange experts as speakers, such as John Carter, Dan Gramza or Trevor Harnett.

The major advantage of webinars lies in their interactivity. Unlike webcasts, the speaker and audience can communicate with each other. Questions are answered live and directly during the discussions. With the various webinars which are offered alongside our "traditional" seminars, you can now enhance your knowledge of Eurex and the derivatives markets – very conveniently, from your office.

The topics of webinars held so far range from the current techniques in proprietary trading, new trading strategies and analyses for DAX® Futures and Dow Jones EURO STOXX 50® Index Futures to the advantages and applications of iTraxx® Credit Futures.

Tom Busby from DTI Trading Education will conduct the next webinar, scheduled to take place on October 10, 2007: "Money Management Strategies: Focus Markets – DAX® and Dow Jones EURO STOXX 50® Index Futures". More detailed information, and recordings of past webinars, are available from the Eurex website under **www.eurexchange.com > Education > Webinars**. Further details are also available from Stephanie Hammer, on T +1-312-544-10 90, e-mail: Stephanie.Hammer@eurexchange.com.

Status as of July 31, 2007

Eurex Trading Volume Rose by 52 Percent to 162 Million Contracts in July

- **First seven months up 52 percent year-on-year**
- **Equity index derivatives grew by 66 percent year-on-year and reached 62.5 million contracts**
- **Contract turnover in the interest rate derivatives segment up 45 percent year-on-year**

Trading volume at the international derivatives exchange Eurex reached 162.4 million contracts in July, a rise of 52 percent year-on-year (July 2006: 107 million). The average daily trading volume was 7.4 million contracts compared with 5.1 million a year ago. Drivers of growth were the segments equity index and interest rate derivatives. The first seven months of this year saw a volume of 1.13 billion contracts, an increase of 22 percent over the same period last year.

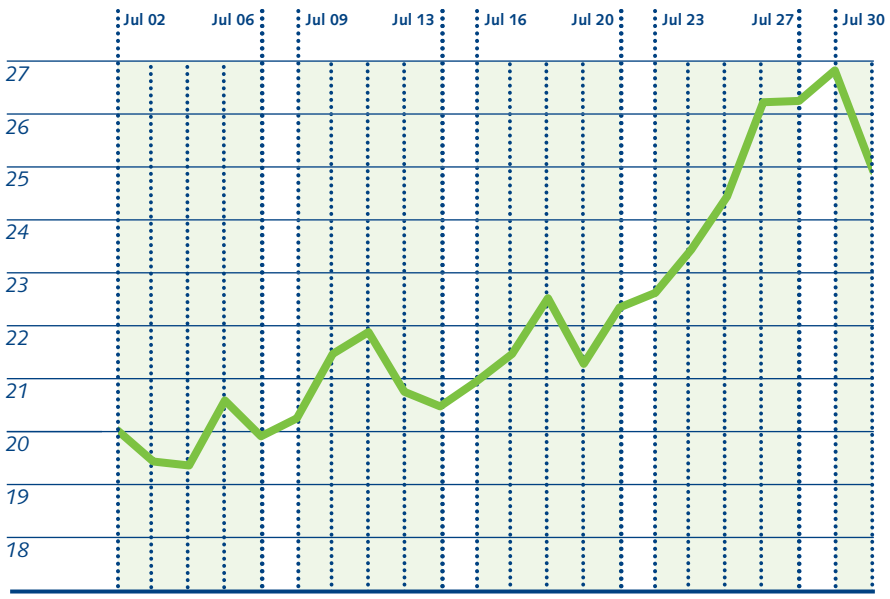

Equity index derivatives saw the strongest growth, the segment reached 62.5 million contracts, an increase of 66 percent compared with 37.5 million contracts in July 2006. Thereof, 27.2 million contracts were traded of the Dow Jones EURO STOXX 50® Index Futures (July 2006: 16.3 million) and another 19.8 million contracts in the Dow Jones EURO STOXX 50® Index Options. DAX® Options and Futures recorded a combined volume of more than 13 million contracts.

Contract turnover in the interest rate derivatives segment in July was up 45 percent to 73 million (July 2006: 50.3 million). The Euro-Bund Futures saw a volume of 33 million contracts (July 2006: 21.7 million). 15 million contracts were traded in the Euro-Bobl Futures (up 34 percent), 15.6 million contracts in the Euro-Schatz Futures (up 47 percent). Options on Euro-Bund Futures and Euro-Bobl Future set a new record with 5.5 million respective 2.5 million contracts. The previous record stood at 5.4 million in June 2007 (Bund) and 2.1 million in July 2006 (Bobl).

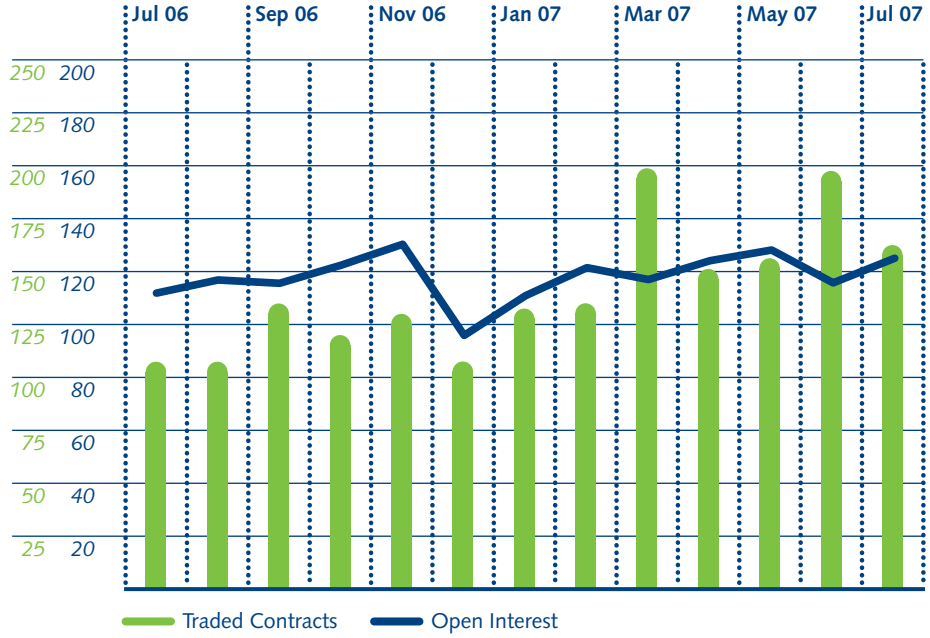

Trading volume in equity derivatives (equity options and single stock futures) accounted for 26.7 million contracts (July 2006: 19.2 million). The most heavily traded equity option was Allianz with 2.9 million contracts. The most heavily traded single stock future was on Banco Bilbao with 736,600 contracts.

Approximately EUR 12.12 billion (single counting) were traded in July on the electronic trading platform Eurex Bonds, which rounds out Eurex's interest rate product range (June 2007: EUR 17 billion; July 2006: EUR 14.94 billion).

VDAX (in Percent, at Day End): July 2007

Status as of August 31, 2007

In August Trading Volume at Eurex Grew by 64 Percent to 175 Million Contracts

- **Open interest with new record at the end of August**
- **Equity index derivatives up 126 percent year-on-year**
- **Interest rate derivatives up 35 percent year-to-year**

At the international derivatives exchange Eurex about 175.1 million contracts were traded in August, a rise of 64 percent year-on-year (August 2006: 107 million). The daily average trading volume was 7.6 million contracts compared with 4.6 million in August 2006. Drivers of growth were the segments equity index and interest rate derivatives. Open interest reached a new record at the end of August with more than 130 million contracts.

Equity index derivatives grew by 126 percent to 79.3 million contracts (August 2006: 35.1 million), the third-best monthly figure ever. The most traded product of Eurex was the Dow Jones EURO STOXX 50® Index Futures with 36.7 million contracts (August 2006: 15 million); another 25.9 million contracts were traded in the Dow Jones EURO STOXX 50® Index Options (plus 125 percent), both are the second-best monthly figures. DAX® Options and Futures recorded a combined volume of 14 million contracts.

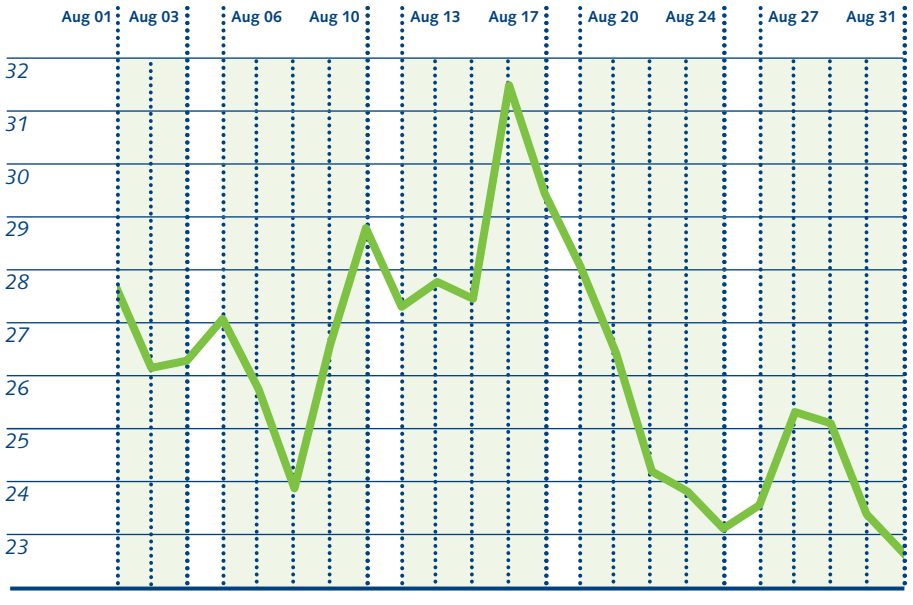

Contract turnover in the interest rate derivatives segment in August was 67.6 million contracts (August 2006: 50 million), an increase of 35 percent. The Euro-Bund Futures gained by 35 percent and reached 28.1 million contracts (August 2006: 20.8 million). 18.5 million contracts in the Euro-Schatz Futures translate into a growth figure of 60 percent year-on-year. The options on Euro-Schatz Futures recorded further 2 million contracts.

Trading volume in equity derivatives (equity options and Single Stock Futures) accounted for 28.2 million contracts after 21.9 million in August 2006. The most heavily traded equity option was Allianz with 3.1 million contracts. The most heavily traded single stock future was on Banco Santander with 691,900 contracts.

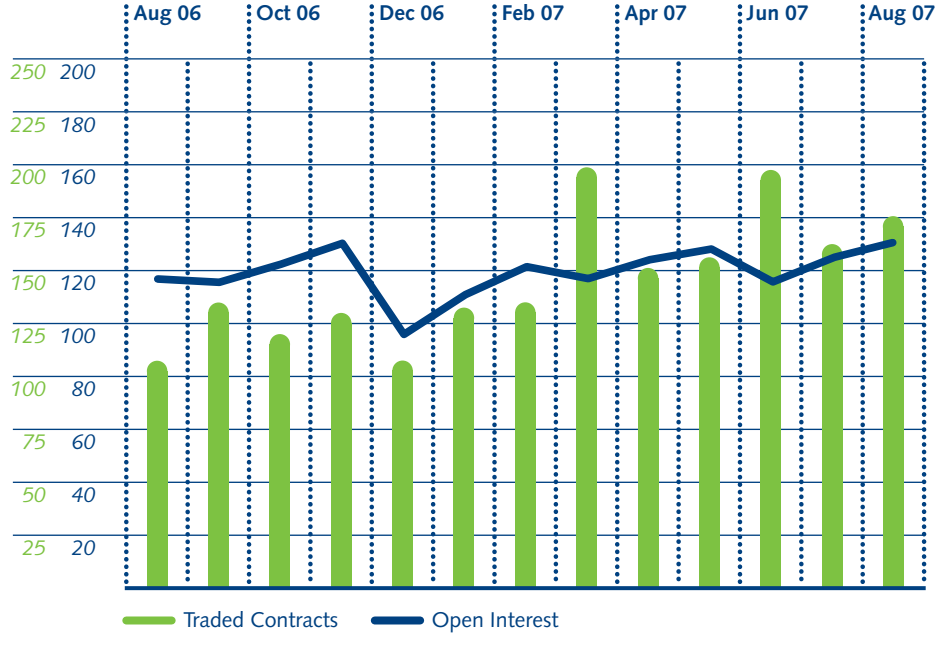

Eurex Repo, which operates CHF and EUR repo markets, set in August in its money market segment Euro GC Pooling® a new record. Average outstanding volumes reached EUR 14.6 billion in August (August 2006: EUR 11.9 billion), the daily traded volumes peaked at EUR 37 billion. All Eurex Repo markets grew by 19 percent, average outstanding volumes were EUR 95.1 billion (August 2006: EUR 80.1 billion).

Approximately EUR 13.6 billion (single counting) were traded in July on the electronic trading platform Eurex Bonds, which rounds out Eurex's fixed income product range. This is an increase of 12 percent compared to July 2007 with EUR 12.1 billion; volume in August 2006 was EUR 13.5 billion.
