A patch, in the form of a replacement file, to overcome the problems with backward compatibility in the current Release 6.0 simulation software is available on our web-site "eurexchange.com" at 'info for members > Eurex software kits > Release 6.0 simulation'.

Members affected should replace the shared library file "**EurexBccon**" on all MISSs and workstations in the simulation environment with the new version.

1. Before starting the installation, please make a security copy of the current version of "EurexBccon" so that it can be restored in the event of unforeseen problems with the replacement file.
2. Before replacing the file, the basic architecture, Eurex BESS and all other applications (e.g. @X-ceed, @X-tract, 3rd party applications) must be stopped.
3. Download the files EurexBccon_sun and/or EurexBccon_win from the Eurex web-site and 'Unzip' them
4. To implement the fix for Sun or Windows 2000, please replace the following files with the new version:

   /opt/gate/base91/lib/EurexBccon.so (Solaris)

   \opt\gate\base91\bin\EurexBccon.dll (Windows 2000)

Please note that after installation, MISSs, workstations, and all applications will need to be restarted.

We would also like to inform you that a full software update for Release 6.0 simulation is planned for October 9, 2002 which will also contain the new version of the file mentioned above.
