Content may be most important for:	**Attachments:**
➲ IT / System Administration	none

With this circular we would like to inform members and vendors about the extension of support for Sun Solaris 8 for Eurex and CCP simulation and production.

Since June 13, 2005, the operating systems Sun Solaris 10 and Sun Solaris 8 for Eurex and CCP have been supported in parallel in both the simulation and production environments on MISSes and workstations.

In order to provide members with sufficient time to upgrade their internal systems, Eurex will continue supporting Solaris 8 until July 31, 2006.

From August 1, 2006 onwards, Sun Solaris 10 will be the only supported operating system version for Eurex and CCP, since longer support for Sun Solaris 8 will not be possible.

In addition, support for Windows XP SP1/SP1a, which is provided for workstation installations only, will also be extended for Eurex and CCP until July 31, 2006.

If you have any further questions regarding support for the various operating systems/Service Packs or should you experience any problems related to installation, please do not hesitate to call the Technical Helpdesk at +49-69-211-1 12 00.
