From November 21, 2003 Eurex will make available an Update Kit 2 for Eurex Release 6.1 simulation and recommends its installation on all MISSes and workstations. The updated software can be used from November 24, 2003 onwards.

With the simulation Update Kit 2 for Eurex Release 6.1, simulation will be at the software level which was implemented already for Eurex Release 6.1 production with the roll-out of Update Kit 1 on November 14, 2003.

The Update Kit will be distributed to all participants per File Transfer Protocol (ftp) on Friday November 21, 2003 after 09:00 p.m. CET. Software transmission will be exclusively to the registered report nodes. The kits will also be made available for download from the “member section” of the Eurex homepage under the link:

"www.eurexchange.com > Member Section > Software Kits > Eurex 6.1 Simulation".

Please make sure that your simulation environment is connected to the Eurex system on Friday November 21, 2003, after 09:00 p.m. CET and that the following directories contain at least approximately 60 MB disc space for data transmission:

- SUN Solaris (MISS): /opt/gate/transferdir/release01

- Windows 2000 (MISS): <ftp-root directory>\release01

The software kits should be installed according to the instructions contained in the “read-me” file that is transferred to the appropriate directory together with the updated software.

Please contact our technical help desk on +49-69-211-1 12 00, if you have not received the simulation Update Kit 2 for Eurex Release 6.1 by Tuesday November 25, 2003.

Should you have difficulties accessing the internet links in the “member section”, please contact Eurex Customer Support on +49-69-211-1 17 00.
