Analogous to Eurex Release 6.0, Eurex will transmit a software fix for the production environment of Eurex Release 6.1 on **Friday, October 24, 2003,** after close of trading.

We urgently recommend to install this software fix on all MISSes directly after installation of the production kit for Eurex Release 6.1.

The software fix will be available for SUN Solaris as well as for Microsoft Windows. The following file will be transmitted per file transfer to the respective production-specific environment of all participants:

- SUN Solaris: Eurexr61_hf20031024.tar.Z
- Microsoft Windows: Eurexr61_hf20031024.zip

In preparation of the data transfer, system administrators must make sufficient storage capacity (at least 2 MB) available in the production environment and make sure that the environment can be reached on Friday, October 24, 2003, after 09:00 p.m. CET.

Details to the installation are contained in the “Release Installation Notes” which will be transmitted as a “Read-me” file, together with the software fix, to the directories specified in the following for the data transfer:

SUN Solaris: /opt/gate/transferdir/release00

Microsoft Windows: <ftp-root-directory>\release00

Additionally, the software fix will be made available for download from the Eurex website under “www.eurexchange.com > member section > software kits > Eurex 6.1 production”.

Please forward this circular to your system administrator.
