➲ IT / System Administration	

In order to reduce the time taken to transfer software kits in future, Eurex will distribute the kits only to the Members' report nodes . The onward distribution to further MISSs and workstations will be the responsibility of the member or service provider. This measure will allow us to ensure that every member included in a distribution – as long as the environment is reachable – will receive the kit in parallel to the report distribution, by the start of the following business day.

The first software kits to be distributed only to the report nodes will be those referred to in Circular 104/01 'Simulation Update Kits for Eurex Release 5.0 and GATE 3.0', due for transmission on 31 October, 2001.
