➲ IT / System Administration	

The following modifications have been made to the VALUES interfaces published with the Final Version of the Member Front End Development Guide:

Inquire Collateral Security Detail:

- The newly-created field "secuExpDat" has been added to the response
- The field "wknNo" has been added to the response - however, it is likely to be removed in a future release and should not be used

Inquire Security Movement:

- The fields "secuTyp" and "collDispDcml" have been added to the response records
- The maximum number of records has been decreased to 30 (previously 34)

Inquire Member Information:

- The new field "nonEurexCurrSetl" has been introduced into the response message

Updated versions of Appendix 1 and Appendix 2 to Volume 2 of the Member Front End Development Guide have been published at the usual location on our web-site:"www.eurexchange.com" under the path 'market place > programming to eurex', along with corresponding versions of the header files.

Please Note: These VALUES changes are not included in the Simulation Update Kit delivered on 31 October, 2001 but will be provided with the Eurex Release 5.0 Production Kit.

Recompilation of member-developed or third-party applications with the new header files is only necessary in cases where such applications make use of the modified requests. Otherwise, no action is necessary on the member or vendor side as a result of these changes.
