To ensure a smooth kit distribution, please note the following:

- At least **120 MB** free disk space has to be available in the transfer directory on each of your MISSes in the Advanced Simulation environment.
- Make sure that the report MISSes of your Xetra simulation environment will be reachable without interruption from Friday evening, **December 12, 2008** until Tuesday morning, **December 16, 2008** to enable the file transfer.
- Check that the necessary read and write permissions for files and folders are set correctly.

Deutsche Börse AG will monitor the successful distribution of the kits. In case of any transfer problems, another transfer for the next day will be initiated automatically. In addition, the software will be available on the website of Deutsche Börse Group www.deutsche-boerse.com for download as of **December 12, 2008** under the following path:
